PART TWO: EXPENDITURES

Expenditures include current operations, capital purchases, and intergovernmental expenditures.

Expenditures treated as special funds for accounting purposes should be placed in "Other Fund".

Current operations are the day-to-day operating expenses for the different components of county government. ***This does not include personnel costs (wages/salaries). Personnel expenditures are to be reported separately.*** Some typical operating expenses would include rent, utility bills, travel, training, motor fuels, maintenance costs, paper, computer disks, routine office supplies, service contracts for office equipment, and other contractual agreements, such as leases. Contractual agreements would also include contracts for services with law firms, engineers, architects, accounting firms, and other service contracts. Small item purchases such as pencil sharpeners, paper cutters, and reference books should also be considered current operating expenses although they may be used for many years. *Record only those items purchased during the most recently completed fiscal year.*

Capital purchases – include items that will be used for several budget years. Common examples are office furniture, computers, typewriters, copier machines (bought, not leased), vehicles (bought, not leased), and heavy machinery (bought, not leased). *Do not include the purchase of real property or new construction in this section. Only those expenses incurred during the most recently completed fiscal year should be recorded.*

Intergovernmental expenditures – include payments to other governments, between counties, between a county and a municipality, or a county and a special purpose district. Payments for fire protection services, road maintenance, hospitals, etc., made to another government should be reported. Record only those payments made during the most recently completed fiscal year.

Some types of expenditures may not be applicable to your county. On the other hand, your county may have expenditures that are not listed. When an expenditure is not applicable to your county, leave that item blank. If your county has an expenditure that is not listed, look for a category that might reasonably encompass that activity. Because each county has a different operating structure, placement of expenditures will vary to some degree. However, if care is taken to place expenditure amounts in the most appropriate categories for your county structure, the presentation of the data will accurately reflect the kinds of expenditures that take place in the county.
