REVENUE IMPACT ^{1/}

This bill will decrease General Fund individual income tax revenue by \$45,394 in FY 2013-14.

Explanation

Section 1.B. of this bill creates a deduction from South Carolina taxable income for actual costs incurred by a taxpayer to purchase identity theft protection and resolution services. The deduction may not exceed \$200 for an individual taxpayer or \$300 for joint or head of

Statement of Estimated State Revenue Impact

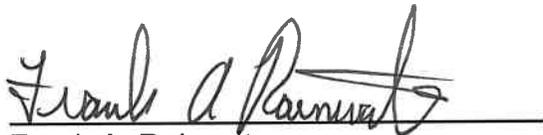

household returns. Expenditures on identity theft protection and resolution services that qualify as a business expense are not eligible for the deduction. Taxpayers eligible for the proposed identity theft protection and resolution services program contained in Section 1.A. of this bill are not eligible for the deduction. This excludes taxpayers that filed a return with the South Carolina Department of Revenue for any year after 1997 and before 2013 from the proposed deduction. Currently, 1,281,547 individuals and families have enrolled in the Experian ProtectMyID or Family Secure programs provided at no cost to taxpayers that have filed a South Carolina tax return since 1998. These taxpayers will receive the free services provided under the provisions of this bill, but will not be eligible for the deduction.

Persons eligible for the proposed deduction include new taxpayers filing their first return in 2013 or later. We anticipate that one percent, or 21,762, of the 2,176,159 individual income tax returns filed for the 2013 tax year will result from new taxpayers filing their first return in South Carolina. An estimated 9,219 returns that are non-taxable or have less than \$3,000 of taxable income further reduces the potential number of returns that could claim the deduction. If 100% of the remaining 12,543 eligible returns claim the deduction at an average cost of \$260, this would result in deductions totaling \$3,261,067. At an average tax rate of 5.8%, these deductions could reduce income tax revenue by \$189,142 in FY 2013-14.

We further reduce the expected revenue impact based on a U.S. survey on identity theft in November 2010 that reported only 12% of consumers were enrolled in an identity theft protection program. To account for additional uncertainty felt by taxpayers from the recent data breach in South Carolina, we expect that 3010, or 24%, of the new returns will claim the proposed deduction at an average of \$260 resulting in total deductions of \$782,656. At an average tax rate of 5.8%, these deductions would reduce General Fund individual income tax revenue by \$45,394 in FY 2013-14.

Unless reauthorized by the General Assembly, taxpayers would be eligible for these deductions for five years, or through FY 2017-18.

We do not anticipate that other sections of this bill would not have any affect on General Fund or other agency revenue.
