ABOUT US   EVENTS   BOARDS & COMMITTEES

UI Components

Text Block / Typography

INTENT AND USAGE

Text blocks are the primary way of conveying verbal information to site visitors. Most pages will include at least one text block, but as they are very non-visual elements they should be used in conjunction with other more visual components such as call to actions, graphs, etc. General administration uses a rich text editor, providing the content manager the ability to apply formatting such as bold, italics, underlines, bulleted lists, header / subheader styles, hyperlinks, images, videos.

FIELDS

- Text body with rich text editor available to content manager
- Audience? This may be used to show users certain content on the page; implementation TBD

EXAMPLES

Typefaces

Bulletin Block

INTENT AND USAGE

Bulletin blocks are multipurpose component blocks that allow SCRFA to highlight the information they would most like users to focus on, as well as serve a dual purpose of acting as a place that users can view any updates made to a specific section. This allows SCRFA to prioritize specific content regarding each section of their website, while also allowing users to view recent updates from one central place without SCRFA having to manually record updates every time they are entered.

FIELDS

- Highlights (Section Title)
  - Item title (Link, file, or post)
  - Type of Link (attachment, external link, XLS, PP)
  - Date published
- Recent Updates (Section title)
  - May set up to six links of recently updated items for display
- Each link includes:
  - Date published
  - Link title (max length tbd)
  - Date updated

EXAMPLES

Example of the bulletin boards side by side. Left would be reserved for highlights because the English language is read left to right, therefore prioritizing RFA's most important information. On the right are RFA's recently updated updated items automated by the site itself that requires no upkeep from RFA's behalf.

VIEW MORE

Stats Block

INTENT AND USAGE

Stats blocks are used to display 'at a glance' information about the data that SCRFA manages and maintains. They surface key factoids about the state of South Carolina in a minimal, easy to digest format. They engage viewers to dig deeper into the data to learn more and help clarify to site visitors what SCRFA does as an agency - maintain and provide data to SC residents.

FIELDS

• Stats block header, max length TBD (optional)
• Icon, working from a pre-set list (optional)
• Up to four individual stats, each represented by:
  - a number (to include decimals and percent symbols)
  - a label, max length TBD
  - a footnote / source statement, max length TBD (optional)
  - button link and display text (optional)

EXAMPLES

Vertical Stats Block / 1 column at 50%

Education Expenses at a Glance

AVERAGE EDUCATION COST PER STUDENT IN SOUTH CAROLINA

$7,574

For 2018-2019 schoolyear, as compiled by South Carolina Department of Education (SCDOE)

AVERAGE EDUCATION COST PER STUDENT NATIONWIDE

$12,800

For 2015, as compiled by the Organization for Economic Cooperation and Development (OECD)

in
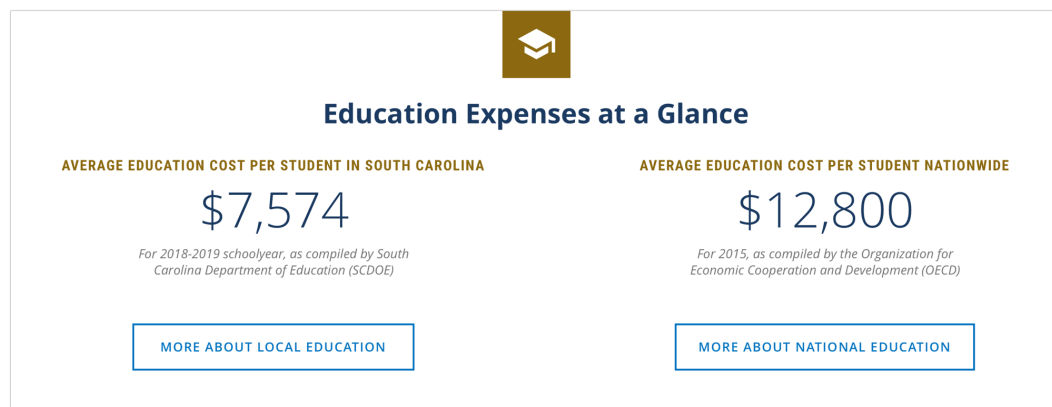

Accordion

INTENT AND USAGE

Accordions are well-suited for handling a large volume of content on a page without it becoming too visually overwhelming, especially when it can be classified some how such as into Q&A, FAQs, etc. Surfacing the title of a section only allows the user to navigate to (expand) sections of interest. Accordions allow users to easily scan past or skip content that does not interest them. This accommodates a limited number of 'levels' - just a parent (displayed section header) and child (content that displays when the section is opened).

FIELDS

- A page's accordion component is made up of one to several accordion sections. Each section requires a section title and section content, where the content is specified via rich text editor (conceivably the content creator could use the rich text editor to put in an image or other media). Color theme options TBD.

EXAMPLES

Expand All | Collapse All

Closed / 1 column at 100%

> Accordion 1

> Accordion 2

> Accordion 3

Expand All | Collapse All

Open / 1 column at 100%

∨ **Accordion 1**

In hac habitasse platea dictumst. Vivamus adipiscing fermentum quam volutpat aliquam. Integer et elit eget elit facilisis tristique. Nam vel iaculis mauris. Sed ullamcorper tellus erat, non ultrices sem tincidunt euismod.

> Accordion 2

> Accordion 3

Contact

INTENT AND USAGE

Contact blocks are meant to be used when many contacts are being included on a page. They are vertical in orientation because they can be used alone and next to another component such as a text block, or an image, or banner, as well as in a grid when displaying multiple contacts. A visual example of the blocks in a grid is included and be viewed below.

FIELDS

- Fields
- Name
- Title
- Email
- Phone Number
- Affiliated Organization
- Optional description
- Optional website

EXAMPLES

Contact block with optional text desc.

Jane Shirley Smith
FISCAL IMPACTS

Optional desc text goes here lorem ipsum dolor sit amet, consectetur adipiscing elitt pretium pretium tempo

📞 (123) 456 7890
✉ jane.smith@rfa.sc.gov

Media (image/video)

EXAMPLES

1 column image at 100% - Optimal Image Size - 1200x800 (3:2 image ratio) - Optimal maximum file size: under 300kb, Optimal minimum file size: under 90kb

1 column at 75% - Optimal Image Size - 1200x800 (3:2 image ratio) - Optimal maximum file size: under 300kb, Optimal minimum file size: under 90kb

Media (image/video) - Continued

1 column at 66% (3:2 image ratio) - Optimal file size: under 300kb - Optimal maximum file size: under 300kb, Optimal minimum file size: under 90kb

1 column at 50% - Optimal Image Size - 1200x800 (3:2 image ratio) - Optimal maximum file size: under 300kb, Optimal minimum file size: under 90kb

1 column at 33% Optimal Image Size - 600x400 (3:2 image ratio) - Optimal maximum file size: under 180kb, Optimal minimum file size: under 30kb

1 column at 25% - Optimal Image Size - 600x400 (3:2 image ratio) - Optimal maximum file size: under 180kb, Optimal minimum file size: under 30kb

Media (image/video) - Continued
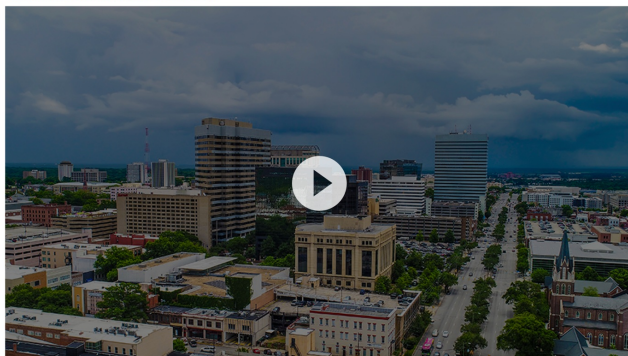

Image slideshow at 50%

2 columns at 50% / 50%

3 columns at 33% with caption text / 33% / 33%

1 column video at 75% (16:9 video ratio)

Media (image/video) - Continued

CARD IMAGE SIZES

Large Card - Optimal Image Size - 1200x800 (3:2 image ratio) - Optimal maximum file size: under 300kb, Optimal minimum file size: under 90kb

Mapping

Find mapping, demographic, and statistical analysis of various geographical areas in South Carolina

Small Card - Optimal Image Size - 800x533 (3:2 image ratio) - Optimal maximum file size: under 180kb, Optimal minimum file size: under 30kb

Mapping

Find mapping, demographic, and statistical analysis of various geographical areas in South Carolina

Featured Media (image/video)

INTENT AND USAGE

A component that allows the user to insert an image or video anywhere in the body of the webpage. Featured images and videos can only be 100%. They are meant to be used as a feature, or separator of content blocks.

FIELDS

- File (.jpg/png or .mp4/mov/avi)
- Metadata field
- Optional caption

EXAMPLES

Image at 100% (3:2 image ratio)

Caption text cras quis nulla commodo, aliquam lectus sed, blandit augue. Cras ullamcorper bibendum bibendum. Duis tincidunt urna non pretium porta. Condimentum vitae ligula vel ornare. Phasellus at semper turpis.

Video at 100% (16:9 HD video ratio)

Caption text cras quis nulla commodo, aliquam lectus sed, blandit augue. Cras ullamcorper bibendum bibendum. Duis tincidunt urna non pretium porta. Condimentum vitae ligula vel ornare. Phasellus at semper turpis.

Embedded Content (IFrame)

INTENT AND USAGE

Embedded iframes should be used sparingly. They are especially useful in instances where an interactive feature is housed in a separate application. As you will see from examples below, embedding content in an iframe places the content on the page so that global elements including the header, footer, and breadcrumb, are applied. The site's global styling is not applied to content in an iframe, so using these can create inconsistency in the user experience, which is why they should be used sparingly. If the information can be maintained directly in the CMS using native components, it is recommended you do that.

## FIELDS

- Title
- Optional Text Description
- Embed Code

EXAMPLES

IFrame at 100%
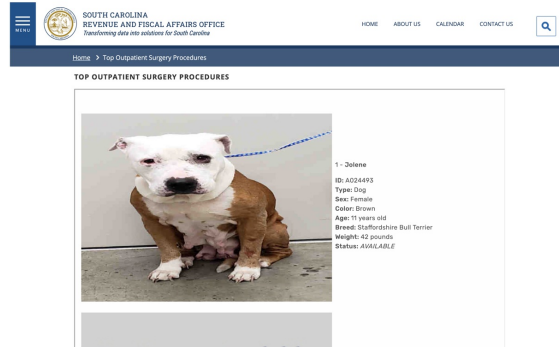

It is **recommended** embedded IFrames are inserted into full width sections in order to allow for an adequate viewing experience for the user, and a likelihood that the source material will fit seamlessly into the website's layout builder.

IFrame at 50%

It is **not recommended** to use IFrames at reduced section widths unless the original content is responsive or can easily be condensed without spilling off the page so as to avoid instances where an internal frame scroll is required on a reduced section container. Content best suited for partial width embedding are photo or visual heavy IFrames, and IFrames whose source content exhibits responsive behavior.

IFrame on Mobile Display
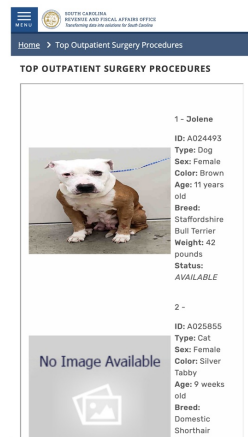

IFrames rely on the original content's ability to resize for smaller devices. It is not recommended to use iFrames if the original content is not mobile responsive.

The Budget Development Section supports the General Assembly in the development of an appropriation bill by reviewing state agency budget plans and providing analysis and reports to the Ways and Means and Senate Finance Committees.

The section interacts with legislators, legislative staff, the Governor's Office, constitutional officers, and state agencies regarding budget issues and is responsible for producing the General Assembly's budget recommendations in the appropriation bill format at each stage of the budget process. We also prepare a variety of reports that support the General Assembly's budgetary decision-making including analytical and historical budget reports, summaries, and other statistical information. Throughout the fiscal year, this section consults with and advises state agencies on budget priorities, cost-effectiveness, and statewide considerations regarding agency plans and funding needs.

AHRQ ICD-9 CCS Diagnosis and Procedure Groupings

For discharges or visits prior to October 1, 2015, the Agency for Healthcare, Research, and Quality's (AHRQ) Clinical Classification Software (CCS) uses the primary ICD-9-CM diagnosis code to assign a CCS diagnosis category for inpatient discharges and emergency department visits. For outpatient surgery visits, the highest charge outpatient surgery ICD-9-CM procedure code is used to assign the CCS procedure category. Please visit the link below for more information.

State Data Center

Share this page   Print   Email

The State Data Center for South Carolina is the coordinating unit for Census information in the state. The South Carolina State Data Center site provides U.S. Census Bureau demographic, social, economic, and housing statistics for South Carolina. The State Data Center Program is a cooperative program between the states and the Census Bureau that was created in 1978 to make data available locally to the public through a network of state agencies, universities, libraries, and regional and local governments. State Data Centers also provide training and technical assistance in the use of Census Bureau data for research, administration, planning and decision making to local governments, the business community, researchers, and other interested data users.

For more information about the Census Bureau and the State Data Center Program, please visit the U.S. Census Bureau website.
