

# Education Funding Model

Formula, Assumptions, and Funding Options

October 3, 2019  
(Updated)

*Presented to*

*The Honorable Henry McMaster, Governor*

*The Honorable Harvey Peeler, President of the Senate*

*The Honorable Jay Lucas, Speaker of the House of Representatives*

## Acknowledgements

As with the May 9<sup>th</sup> report, this report is developed and presented by the Revenue and Fiscal Affairs Office (RFA). It reflects the efforts and contributions of many other individuals who are involved with public education, its policies, and funding on a daily basis. RFA staff spent many hours researching and analyzing the data and preparing this report, but this analysis would not have been possible without the support and assistance of those individuals who provided data and expert insight. Their efforts and cooperation are very much appreciated.

This report and accompanying material may be found at <http://rfa.sc.gov/econ/educ/model>

All comments from interested parties are welcomed and may be emailed to [EdFund@rfa.sc.gov](mailto:EdFund@rfa.sc.gov). While this report attempts to identify data and policy issues for follow-up, any comments to improve or guide this analysis are especially welcomed. Please note that all correspondence is considered public information.

Updated following release to correct a typographical error in the total local share on page 25, 30, and 32.

## EXECUTIVE SUMMARY

### Introduction

This is the second report pursuant to the letters by the Governor, President of the Senate, and Speaker of the House requesting the development of a new formula for funding public education. The first report on May 9<sup>th</sup> presented data and issues regarding the eleven items listed in the request. This second report focuses on the formula, assumptions, and funding options in the new Education Funding Model. As comments are received, the model may be updated and additional information regarding the other requested items can be incorporated. We anticipate the next report will be the final report and incorporate all of the requested items.

As invited by a second letter, this report takes significant steps to identify and present current levels of services in one model that can be adjusted to fit new goals or changing expectations of policy makers and can be understood and measured in the budgeting process. It combines an array of many individual programs into one framework so comparisons can be done easily and can ultimately incorporate performance measures tied to specific funding categories. Funding to local districts has evolved through time in a piecemeal and fragmented manner and blending these pieces into a single framework creates results that pose difficult and serious questions for policymakers as they study and review this model. These issues are presented in this report, and feedback from all persons is welcomed. In general, we expect questions to center around three broad categories – accuracy of model and assumptions based on current services, adequacy of current services and goals for targeted improvements, and equity as to the availability of services and impact on the local tax base.

### Goals and Principles

The goals of the Education Funding Model are to have a model that focuses on the needs of a student, provides equal service opportunities to students in all districts, and impacts the local property tax base similarly. The model should also be understandable, provide clarity and transparency in budgeting, and allow for alignment with proper accountability measures. The main principles are:

- Each student is provided the same basket of services for similarly situated peers.
- The costs for this basket of services are clearly defined.

- The model is flexible so the list of services or assumptions can be amended, and the cost and impact on school districts and the state can be calculated easily and compared.
- Funding and state appropriations for these services is meaningful, measurable, and transparent.
- There is a consistent and equitable impact on local millage rates.

### Model and Assumptions

The model is based on several assumptions:

- Students drive the need for resources, and different students require different resources.
- All students receive the same basic resources, and additional resources are provided for specific needs.
- A teacher is the primary resource for all students, and additional teachers or resources are allocated for other identified needs.
- The cost of the model is based primarily upon the state cost of a teacher and the number of teachers to serve a student.
- Other resources are allocated based upon either the number of teachers to support students or the students themselves.

The model addresses the costs for instructional programs for kindergarten through 12<sup>th</sup> grade in the regular eighty-one local school districts<sup>1</sup>. The model does NOT address or impact funding for the statewide charter districts, special districts, or specific programs outside the basic educational program for kindergarten through 12<sup>th</sup> grade, such as 4-year-old kindergarten or adult education.

The model divides these services into three major subcategories – Instruction, Facilities, and District Services.

- Instruction - Cost for direct and indirect instruction and resources in the classroom setting
- Facilities and Transportation - Cost for buildings and transportation to accommodate, transport, and secure students
- District Services - Cost for district-wide services to support the schools in a district

---

<sup>1</sup> Orangeburg County school districts are not consolidated in this model as it is based upon FY 2018-19 students and funding.

## Key Results and Statistics

The model uses FY 2018-19 data as a reference point for staffing level and state appropriations and results in the following costs:

	Total Cost	% of Total Cost	Average Cost per Student
Instruction	\$4,285,662,739	78.5%	\$5,943
Facilities	\$1,005,803,194	18.4%	\$1,395
District Services	\$170,258,064	3.1%	\$236
<b>Total</b>	<b>\$5,461,723,998</b>	<b>100.0%</b>	<b>\$7,574</b>

The model requires 45,241 teachers as compared to the current 45,277 teachers reported under the Professional Certified Staff data system from the Department of Education for FY 2018-19<sup>2</sup>. The model may not reflect actual staffing levels by district based upon local decisions. A comparison of staffing levels in the model to actual reported personnel by district is included in the Appendix.

Many of the comments received in developing this report focused on adequacy of funding with specific concerns about the level of teacher salaries, student-teacher ratios, and access to technology. As presented here, the model serves as starting point for discussions on adequacy by providing a standard to explain current levels of key services so goals on alternative standards can be compared and quantified.

Based on state appropriations for FY 2018-19, state funding is sufficient to pay for \$4,233.9 million or 77.5 percent of the model. These state appropriations include the funding provided to these districts through General Funds, EIA Funds, Education Lottery Account, and the Property Tax Relief Fund. The model proposes to allocate all state funding on an equity basis and would result in the following average funding amounts:

---

<sup>2</sup> Teachers includes non-federally funded staff classified as classroom teacher (08), kindergarten (05), special education (03, 06, & 07), retired teachers (09), and speech therapist (17).

	State Share of Cost	% of Total Cost	State Share per Student
Instruction	\$3,322,243,461	77.5%	\$4,607
Facilities	\$779,698,098	77.5%	\$1,081
District Services	\$131,983,960	77.5%	\$183
<b>Total</b>	<b>\$4,233,925,519</b>	<b>77.5%</b>	<b>\$5,871</b>

The 22.5 percent local match is distributed on a revised property tax index that more closely represents the actual tax base and equates to a local millage of 75.0 mills among all taxable property in the state, excluding owner-occupied homes. Please note, this millage rate of 75.0 mills is not an increase but represents the amount of the current tax rate that supports the education services included in the model.

The proposal to allocate all state funding on an equity basis is expected to receive the most discussion because of the impact it would have on the distribution of state appropriations for education, Property Tax Relief funds, and local districts. Property Tax Relief funds account for over 28 percent of state support to local school districts but are distributed by several different formulas, none of which are tied to service needs or consider equity like in the EFA.

Implementing this change in funding in one step would redistribute \$173.9 million, or 4.1 percent of state funding, with fifty-five districts receiving an increase and twenty-six districts receiving a decrease and likely require significant decisions at the local level. On the other hand, not implementing this change would continue the current practice of providing significantly varying levels of state support to each district. If equity is to be a prime consideration in state funding, then all significant amounts of funding need to be included in the analysis and discussion. In anticipation of discussion on this issue, several options for considering alternative methods are presented, but each alternative presents different balances between equity and state funding at a local level.

### Issues and Next Steps

The report identifies key questions and comments or proposed answers for these questions are welcomed. Any comments received previously do not need to be resubmitted and may be referenced in the next report.

## List of Abbreviations and Terms

ADM – Average Daily Membership (student count)

EFA – Education Finance Act

EIA – Education Improvement Act

FY – Fiscal Year

IDEA – Individuals with Disabilities Education Act

ITA – Index of Taxpaying Ability

PCS – Professional Certified Staff (SDE school district professional staff data system)

SDE – S.C. Department of Education

TY – Tax Year

## I. EDUCATION FUNDING MODEL - GOALS AND PRINCIPLES

The proposed model is based upon the premise that *students drive the need for resources* and that while all students require some common resources, *some students may require additional resources*.

The model was developed after reviewing the current Education Finance Act model, state appropriations and programs outside the EFA including the Education Improvement Act (EIA), district expenditures for educational programs, and meetings and conversations with numerous other individuals involved in public education.

The model attempts to create a framework that defines a common set of services or programs, which matches the current level of statewide resources in terms of students, teachers, and funding. If policy makers wish to add or remove programs from the model, these decisions can be easily implemented and measured.

The model comprises three major educational categories, and each category is based on a particular set of assumptions. These categories are Instruction, Facilities, and District Services. Instruction is broadly defined to include those services students need when they enter a school. Facilities is broadly defined to include those resources to have the school ready for the student. District Services represents basic services to support the school operations. Each of these categories consists of several funding programs and is driven by a formula.

The formula for funding these programs is based either directly or indirectly on the number of students and a targeted ratio of students to resources. In some programs, the number of students drives the number of required teachers. In other programs, the number of teachers then determines the need for other resources.

Equity is targeted in terms of access to resources and impact upon the local tax base. In this model, formulas are used to identify and calculate the same services to like students regardless of location. Further, state and local responsibility for funding these basic services is shared in a manner that equates to the same millage rate in all local jurisdictions for the same level of services.

Again, the premise of the model is that students drive the need for resources, and the primary resource is a teacher. Most of the model is based on the cost of a teacher and ratios using a teacher as the standard.

### **Poverty vs. Non-poverty Impact**

The model allocates teachers based on two different student-teacher ratios. A ratio is set for students to teachers, but a lower ratio is provided for students affected by poverty. The decision to provide additional resources for students in poverty stems from a review of current education funding policies and discussions with stakeholders. The EFA provides an add-on weight for students in poverty to provide additional resources to districts in support of these students currently. Further, discussions with the education community indicated that providing additional resources specifically in support of students in poverty is an important step in maintaining adequate resources for these students.

### **Special Note - Special Education**

In developing the assumptions and framework for modeling the need for special education services, the desired data for a detailed allocation of resources for special education students and services are not available. Furthermore, the State Department of Education expressed concerns that any change *in the total funding made available to students* for students served under the Individuals with Disabilities Education Act (IDEA) would have to be approved by the U.S. Department of Education. Given these issues, the Instruction subcategory for Special Education was based on the broad array of services currently made available to students accounted for in IDEA, and the formula is transparent and attempts to match the current level of available funding the State Department of Education reports to the U.S. Department of Education for funding included in the model. Additional review and adjustments may be necessary to fulfil the requirements of the U.S. Department of Education.

## Policy Implications and Issues

- The resources included in the model are designed to represent the current education system for basic education statewide. The model attempts to explain the current instruction staffing levels and expenses, facilities expenditures, and district services as outlined below.
- Policy decisions and goals may influence these initial allocations. The model can be adjusted to account for changes such as targeting a different student-teacher ratio, including additional resources for staff such as mental health counselors, or other policy goals.
- The model is based on allocating resources for the number of students served. The model is designed to grow with additional students or services. For example, lowering the student-teacher ratio to reduce class sizes requires additional classroom space, and the model is designed to increase facilities funding to account for additional space for the additional teachers.
- The model is designed to increase the allocation of all resources as teacher salaries are increased. Policy decisions regarding teacher salaries and funding for other resources may require separating these components and increasing salaries separate from other allocations.
- The model does not include an inflation component. The model anticipates funding increases to be targeted for specific needs. Adding or adjusting for inflation can be incorporated. If an inflation component is added to increase resources, the recommendation is to use the Consumer Price Index. A comparison of the EFA inflation factor to the Consumer Price Index over time indicates that these two measures produce similar results, and the Consumer Price Index is readily available.

## Formulas and Allocation of Resources

### I. Instruction

#### A. Classroom & Specialized Instruction

- i. One teacher for each 16.5 students classified as being affected by poverty
- ii. One teacher for each 21.5 students classified as not being affected by poverty
- iii. One aide for every kindergarten teacher
- iv. One additional teacher for each 17.5 students served under IDEA (special education and speech therapy services)
- v. One specialty service provider for every 120 students served under IDEA (psychologists, therapists, and others)
- vi. Additional resources for students classified as gifted and talented, academic assistance, limited English proficiency, dual enrollment, or career and technology education

#### B. Instructional Support

- i. One guidance counselor for every 350 students and one guidance resource for every 350 students
- ii. One library/media specialist and one library aide for every 685 students
- iii. One career specialist for every 2,260 students<sup>3</sup>

#### C. Health Services

- i. One nurse for every 600 students<sup>4</sup>
- ii. One social worker for every 3,180 students<sup>5</sup>

---

<sup>3</sup> Not all students require services from career specialists. Service level is based upon current staffing in PCS compared to all students, not students served.

<sup>4</sup> Reflects approximately one nurse per school; Additional nurses above PCS level are added to account for districts contracting for these services.

<sup>5</sup> Not all students require services from social workers. Service level is based upon a sample of staffing levels for districts with social workers employed by the district. Additional social workers above PCS level are added to account for districts contracting for these services.

D. School Administration

- i. One school administrator for every 15 teachers
- ii. One school office staff for every 15 teachers

E. Classroom Materials & Technology

- i. An allocation of \$3,344 for classroom materials and technology allocation for every teacher

II. Facilities

A. Facilities

- i. 2,750 square feet per teacher (includes classrooms, common areas, and administrative space)
- ii. \$1.80 for custodial services, \$2.40 for maintenance, and \$1.50 for utilities per square foot

B. Security and Safety

- i. One safety staff for every 640 students
- ii. An allocation of \$6,688 for security and equipment for every 640 students

C. Transportation

- i. One bus driver for every 110 students

### III. District Services

#### A. District Leadership & Services

- i. One superintendent per district
- ii. Range of 6 to 20 program directors (student services, HR/finance, IT, transportation, food services, etc.); minimum of 6 increased by 1 for every 35 teachers above 350, up to a maximum of 20 program directors
- iii. Range of 6 to 20 district staff (student services, HR/finance, IT, transportation, food services, etc.); minimum of 6 increased by 1 for every 35 teachers above 350, up to a maximum of 20 staff

#### B. District Technology

- i. An allocation of \$669 per teacher for technology at the district level

*(See Appendix for additional discussion of model allocations)*

## II. EDUCATION FUNDING MODEL - INPUTS AND ITEM COST

### Cost of a Teacher (FY 2018-19)

Salary ( <i>State Minimum Schedule Actual Average</i> ) <sup>6</sup>	\$44,586
Employer Contribution ( <i>Rate: 28.26%</i> )	\$12,600
Health Insurance ( <i>Composite Average</i> )	\$6,798
<b>Total:</b>	<b>\$63,984</b>

### Number of Students (FY 2018-19) - Regular Districts

Not affected by Poverty	274,928
Affected by Poverty	446,194
Total Students	721,122
Students served under IDEA	93,173

---

<sup>6</sup> Reflects state minimum salary schedule funding only. Does not include local salary supplements or national board payments. Statewide actual average teacher salary is \$50,882 for FY 2018-19 including local payments and supplements.

### III. EDUCATION FUNDING MODEL - TOTAL COST

	Total Dollars	% of Total	Average Cost per Student
<b>I. Instruction</b>			
A. Classroom & Specialized Instruction	\$3,287,691,098	60.2%	\$4,559
B. Instructional Support	\$300,322,861	5.5%	\$416
C. Health Services	\$91,410,006	1.7%	\$127
D. School Administration	\$454,954,041	8.3%	\$631
E. Classroom Materials & Technology	\$151,284,733	2.8%	\$210
<b>Total - Instruction</b>	<b>\$4,285,662,739</b>	<b>78.5%</b>	<b>\$5,943</b>
<b>II. Facilities</b>			
A. Facilities	\$709,157,789	13.0%	\$983
B. Security and Safety	\$79,629,816	1.5%	\$110
C. Transportation	\$217,015,590	4.0%	\$301
<b>Total - Facilities</b>	<b>\$1,005,803,194</b>	<b>18.4%</b>	<b>\$1,395</b>
<b>III. District Services</b>			
A. District Leadership & Services	\$140,001,118	2.6%	\$194
B. District Technology	\$30,256,947	0.6%	\$42
<b>Total - District Services</b>	<b>\$170,258,064</b>	<b>3.1%</b>	<b>\$236</b>
<b>Total</b>	<b>\$5,461,723,998</b>	<b>100.0%</b>	<b>\$7,574</b>

#### IV. MODEL COMPARISON TO STATE FUNDING TO DISTRICTS – FY 2018-19

##### FY 2018-19 State Payments to Regular Districts Used in Model<sup>7</sup>

Education Finance Act (EFA)	\$1,725,488,586
Employer Contributions - EFA	\$763,327,227
Education Improvement Act (EIA)	\$362,918,881
Aid to Districts - Bus Shops	\$60,276,684
Guidance/Career Specialists	\$30,276,941
Student Health and Fitness	\$25,346,156
Reading Coaches	\$38,107,476
Other Aid to Districts	\$4,832,561
Education Lottery	\$14,403,069
Property Tax Relief - Estimate	\$1,208,947,938
<b>Total</b>	<b>\$4,233,925,520</b>

- This state funding to districts of \$4,233.9 million for FY 2018-19 is sufficient to fund **77.5 percent of the model**.
- The remaining \$1,227.8 million, or 22.5 percent, is the required local support.
- Actual local school district expenditures for FY 2018-19 are not available for comparison.

<sup>7</sup> See Appendix for state payments included and excluded. State payments for programs such as 4K and adult education outside the model are excluded.

Model - State and Local Funding based upon FY 2018-19 Payments

	Total	Total Per Student	State Share	State Share Per Student	Local Share	Local Share Per Student	Local Millage
<b><i>I. Instruction</i></b>							
A. Classroom & Specialized Instruction	\$3,287,691,098	\$4,559	\$2,548,616,379	\$3,534	\$739,074,719	\$1,025	45.1

## V. ISSUES IN EDUCATION FUNDING AFFECTING EQUITY AMONG DISTRICTS

The model incorporates equity in the allocation of all state payments in the sense that the local millage rate needed to meet the school district share is the same for all districts. Current funding by the state to the local school districts, however, is by a variety of methods, not all of which consider equity and the balance between state resources and the local resource of property taxes.

The following charts outline the current state funding for property tax relief and the property tax base by district on a per student basis, as the disparities pose significant questions and challenges to incorporating equity. Some key points to consider are:

- State payments for property tax relief to school districts average \$1,676 per student and range from \$809 per student in Dillon 3 to \$4,951 per student in McCormick. These payments include all property tax relief for school operations and the additional funding for districts receiving less than \$2.5 million per county from Tier III funding.
- School district assessed value averages \$22,705 per student and ranges from \$4,882 in Clarendon 3 to \$59,315 in Beaufort. The assessed value represents only property taxable for school operations and excludes homes.
- Nineteen school districts have higher than the statewide average assessed value per student. Four districts, Georgetown, Charleston, Fairfield, and Beaufort, have more than twice the statewide average assessed value per student. Sixty-two school districts have less than the average assessed value per student.

## VI. KEY DISTINCTIONS - STATE AND LOCAL FUNDING RESPONSIBILITIES

### Items Excluded from the Model

1. Local districts are responsible for funding all costs for additional teachers, salaries, and staff outside of model.
  - a. Districts may choose to hire more teachers or other staff than the model requires. Funding for additional positions is a local responsibility.
  - b. Districts may choose to set higher salaries than the model requires. Funding for higher salaries and the associated employer contributions is a local responsibility.
  
2. Local districts are responsible for the allocation of teachers to schools and class size in each school or classroom.
  - a. The model provides funding for the same student-teacher ratio for like students. However, actual class sizes by district will depend on district decisions for allocating teachers and resources.

## VII. EDUCATION FUNDING MODEL - EFFECTS BY DISTRICT BASED ON FY 2018-19

### Base Model

- The model provides funding from the state based upon the total state payments to local districts in FY 2018-19.
- This state funding is sufficient to provide support for 77.5 percent of the model.
- Local Districts would share in the remaining 22.5 percent based on their share of the property tax base.

	State Share	State Share Per Student	State Share %	Local Share	Local Share Per Student	Local Share Per Student	Local Millage
<b><i>I. Instruction</i></b>							
A. Classroom & Sp. Instruction	\$2,548,616,379	\$3,534	77.5%	\$739,074,719	\$1,025	22.5%	45.1
B. Instructional Support	\$232,810,121	\$323	77.5%	\$67,512,740	\$94	22.5%	4.1
C. Health Services	\$70,860,988	\$98	77.5%	\$20,549,018	\$28	22.5%	1.3
D. School Administration	\$352,680,129	\$489	77.5%	\$102,273,912	\$142	22.5%	6.2
E. Classroom Materials & Tech.	\$117,275,844	\$163	77.5%	\$34,008,889	\$47	22.5%	2.1
<b>Total -Instruction</b>	<b>\$3,322,243,461</b>	<b>\$4,607</b>	<b>77.5%</b>	<b>\$963,419,278</b>	<b>\$1,336</b>	<b>22.5%</b>	<b>58.8</b>
<b><i>II. Facilities</i></b>							
A. Facilities	\$549,738,738	\$762	77.5%	\$159,419,051	\$221	22.5%	9.7
B. Security and Safety	\$61,728,991	\$86	77.5%	\$17,900,825	\$25	22.5%	1.1
C. Transportation	\$168,230,369	\$233	77.5%	\$48,785,221	\$68	22.5%	3.0
<b>Total -Facilities</b>	<b>\$779,698,098</b>	<b>\$1,081</b>	<b>77.5%</b>	<b>\$226,105,097</b>	<b>\$314</b>	<b>22.5%</b>	<b>13.8</b>
<b><i>III. District Services</i></b>							
A. District Leadership & Serv.	\$108,528,792	\$150	77.5%	\$31,472,326	\$44	22.5%	1.9
B. District Technology	\$23,455,169	\$33	77.5%	\$6,801,778	\$9	22.5%	0.4
<b>Total - District Services</b>	<b>\$131,983,960</b>	<b>\$183</b>	<b>77.5%</b>	<b>\$38,274,104</b>	<b>\$53</b>	<b>22.5%</b>	<b>2.3</b>
<b>Total</b>	<b>\$4,233,925,519</b>	<b>\$5,871</b>	<b>77.5%</b>	<b>\$1,227,798,479</b>	<b>\$1,703</b>	<b>22.5%</b>	<b>75.0</b>

## District Funding

- State funding is distributed using a revised index of taxpaying ability, which excludes owner occupied property not taxable for school operations and more closely reflects the tax base used to set the local millage rate.
- The issues presented regarding the disparities in property tax relief and the local tax base along with current funding mechanisms results in a reallocation of resources, some significant, to districts in order to achieve greater equity.
- The model redistributes \$173.9 million in funding compared to actual payments for FY 2018-19. Fifty-five districts receive additional funding above actual payments for FY 2018-19, while twenty-six receive less funding.
- The model estimates the local match to be 75.0 mills for all districts.

### Model Funding - FY 2018-19

	Total Cost	State Share Total \$	State Share %	Local Share Total \$	Local Share %	Local Millage	Districts with Gains	Districts with Loss
Instruction	\$4,285,662,739	\$3,322,243,461	77.5%	\$963,419,278	22.5%			
Facilities	\$1,005,803,194	\$779,698,098	77.5%	\$226,105,097	22.5%			
District Services	\$170,258,064	\$131,983,960	77.5%	\$38,274,104	22.5%			
<b>Total</b>	<b>\$5,461,723,998</b>	<b>\$4,233,925,519</b>	<b>77.5%</b>	<b>\$1,227,798,479</b>	<b>22.5%</b>	<b>75.0</b>		
<i>Redistribution</i>							<b>\$173,868,361</b>	<b>(\$173,868,361)</b>
<i>Number of Districts</i>							<b>55</b>	<b>26</b>

## Funding Alternatives

- To understand further the model and how alternative funding formulas might impact equity and/or address the redistribution of state funding, several alternative funding options are presented.
- It is important to note that the “hold harmless” amounts noted in the options are not the same as increasing the cost of the model. The hold harmless amounts represent additional funding to those districts who would experience a reduction to current allocations of state funding.
- The options presented require varying levels of state and local support.
- Each funding option provides varying levels of equity in terms of the impact on the local tax base.
- In addition to the funding alternatives presented, phasing in the changes overtime may reduce the local impact on school districts.
- These funding options undo equity and require the state to fund some districts more than others are funded.
- In some instances, certain districts would receive state funding for 100 percent of the cost of the model.

### Funding Option 1 - Lower State Share within Formula, Distribute a Portion of Funds outside Model

- Option 1 modifies the funding allocation by providing state support for 70 percent of the model within the equity formula and distributing the remaining funds outside the formula to reduce the number of districts receiving less funding than their actual payments for FY 2018-19.
- Under this alternative, \$410.7 million is distributed outside the model to districts that receive less funding than their actual payments for FY 2018-19.
- Additional funding of \$49.6 million is required to fund a “hold harmless” for districts that would receive less funding than actual FY 2018-19 payments.
- The local funding required after the adjustments is equivalent to a local millage rate ranging from 0.2 to 100.1 mills.

<b>Funding Option 1 - Lower State Share within Formula to 70%, Distribute a Portion of Funds outside Model, &amp; Add Hold Harmless Funding</b>								
*Reallocation of funding outside model and adding hold harmless funds creates a range of local millage rates.								
	Total Cost	State Share Total \$	State Share %	Local Share Total \$	Local Share %	Local Millage	Districts with Gains	Districts with Loss
Instruction	\$4,285,662,739	\$2,999,963,918	70.0%	\$1,285,698,822	30.0%			
Facilities	\$1,005,803,194	\$704,062,236	70.0%	\$301,740,958	30.0%			
District Services	\$170,258,064	\$119,180,645	70.0%	\$51,077,419	30.0%			
<b>Total</b>	<b>\$5,461,723,998</b>	<b>\$3,823,206,799</b>	<b>70.0%</b>	<b>\$1,638,517,199</b>	<b>30.0%</b>	<b>100.1</b>	<b>\$49,639,466</b>	<b>(\$460,358,187)</b>
<i>Distribution outside Model</i>		<i>\$410,718,720</i>						
<b>Revised Total</b>	<b>\$5,461,723,998</b>	<b>\$4,283,564,986</b>	<b>78.4%</b>	<b>\$1,178,159,013</b>	<b>21.6%</b>			
<i>Hold Harmless</i>						<b>*0.2-100.1</b>	<b>\$49,639,466</b>	<b>\$0</b>
<i>Number of Districts</i>							<b>35</b>	<b>0</b>

**Funding Option 2 - State Provides \$3,000 Per Pupil, Local Share is 50% of Remaining Costs**

- Option 2 modifies the funding allocation by providing state funding of \$3,000 per pupil to every district totaling \$2,163.3 million.
- Local districts are responsible for providing equity funding based upon the revised index for 50 percent of the remaining costs up to a maximum of the district’s total funding needs.
- The state provides 50 percent support for the remaining costs not covered by state per pupil funding or the local district support.
- Under this alternative, the residual funding of \$343.4 million is distributed outside the model to districts that receive less funding than their actual payments for FY 2018-19.
- Additional funding of \$48.2 million is required to fund a “hold harmless” for districts that would receive less funding than actual FY 2018-19 payments.
- The local funding required after the adjustments is equivalent to a local millage rate ranging from 0.2 to 100.7 mills.

<b>Funding Option 2 – State Provides \$3,000 Per Pupil, then 50% of Remaining Costs, &amp; Add Hold Harmless Funding</b>								
*Reallocation of funding outside model and adding hold harmless funds creates a range of local millage rates.								
	Total Cost	State Share Total \$	State Share %	Local Share Total \$	Local Share %	Local Millage	Districts with Gains	Districts with Loss
<i>Distribution per Pupil</i>		\$2,163,366,750						
<i>50% Local Support for Remaining Costs</i>								
Instruction	\$4,285,662,739	\$2,991,598,195	69.8%	\$1,294,064,545	30.2%			
Facilities	\$1,005,803,194	\$702,098,883	69.8%	\$303,704,312	30.2%			
District Services	\$170,258,064	\$118,848,297	69.8%	\$51,409,767	30.2%			
<b>Total</b>	<b>\$5,461,723,998</b>	<b>\$3,812,545,374</b>	<b>69.8%</b>	<b>\$1,649,178,624</b>	<b>30.2%</b>	<b>*73.0-100.7</b>	<b>\$48,243,806</b>	<b>(\$391,650,477)</b>
<i>Residual outside Model</i>		\$343,406,670						
<b>Revised Total</b>	<b>\$5,461,723,998</b>	<b>\$4,282,169,325</b>	<b>78.4%</b>	<b>\$1,179,554,673</b>	<b>21.6%</b>			
<i>Hold Harmless</i>						<b>*0.2-100.7</b>	<b>\$48,243,806</b>	<b>\$0</b>
<i>Number of Districts</i>							<b>34</b>	<b>0</b>

### Funding Option 3 - Eliminate Facilities costs and Property Tax Relief Funding

- Option 3 removes facilities costs and property tax relief funding from the model. This option lowers the cost of the items funded in the model to \$4,445.9 million. State funding includes only the budgeted funds for education of \$2,964.7 million excluding transportation funds.
- These state funds are sufficient to pay for 66.5 percent of the model excluding facilities, with the remaining 33.5 percent of funding from local districts. Since property tax relief funding is not included in this option, the current imputed index is used to distribute state and local funding.
- Under this option, \$94.1 million is redistributed with sixty-six counties receiving more than actual payments and fifteen districts receiving less.
- This results in an average millage rate of 91.1 mills and a range of 78.0 to 128.6 mills on the taxable property. Because funding is allocated using the imputed index, the resulting millage rate for local funding on taxable property is unequal across districts.
- Additional funding of \$94.1 million would be required to hold harmless the fifteen districts receiving less funding.
- This option with additional hold harmless funding results in a local millage rate of 85.3 on average, with a range from 69.4 to 128.6 mills on the taxable property.

<b>Funding Option 3 - Eliminate Facilities Costs and Property Tax Relief Funding from Model &amp; Add Hold Harmless Funding</b>								
*Reallocation of funding outside model and adding hold harmless funds creates a range of local millage rates.								
	Total Cost	State Share Total \$	State Share %	Local Share Total \$	Local Share %	Local Millage	Districts with Gains	Districts with Loss
Instruction	\$4,285,662,739	\$2,851,424,302	66.5%	\$1,434,238,438	33.5%			
Facilities	\$0	\$0	66.5%	\$0	33.5%			
District Services	\$170,258,064	\$113,279,558	66.5%	\$56,978,506	33.5%			
Total	\$4,455,920,804	\$2,964,703,860	66.5%	\$1,491,216,944	33.5%	*78.0-128.6	\$94,068,010	(\$94,065,048)
<b>Revised Total</b>	<b>\$4,455,920,804</b>	<b>\$3,058,768,907</b>	<b>68.6%</b>	<b>\$1,397,151,897</b>	<b>31.4%</b>	<b>*69.4-128.6</b>		
<i>Hold Harmless</i>							<b>\$94,068,010</b>	<b>\$0</b>
<i>Number of Districts</i>							<b>66</b>	<b>0</b>

#### Funding Option 4 - State Funds 80% of Instruction and Facilities

- Under this option, the state provides funding for instruction and facilities. District Services are funded entirely by each local district.
- State funding for FY 2018-19 is sufficient to provide 80 percent of the model costs for Instruction and Facilities.
- The local districts provide the remaining 20 percent of Instruction and Facilities and all District Services costs.
- This option redistributes \$154.3 million with forty-eight districts receiving additional funds and thirty-three receiving less.
- The local millage rate ranges from 66.8 to 255.0 under this option without a hold harmless.
- Additional funding of \$154.3 million would be required to hold harmless districts receiving less funding.
- The revised local millage rate with a hold harmless averages 65.6 and ranges from 0.2 to 255.0 mills.

<b>Funding Option 4 - Eliminate District Services from the Model, State Funds 80% of Instruction and Facilities &amp; Add Hold Harmless Funding</b>								
*Reallocation of funding outside model and adding hold harmless funds creates a range of local millage rates.								
	Total Cost	State Share Total \$	State Share %	Local Share Total \$	Local Share %	Local Millage	Districts with Gains	Districts with Loss
Instruction	\$4,285,662,739	\$3,429,136,450	80.0%	\$856,526,289	20.0%			
Facilities	\$1,005,803,194	\$804,784,838	80.0%	\$201,018,356	20.0%			
District Services	\$170,258,064	\$0	0.0%	\$170,258,064	100.0%			
<b>Total</b>	<b>\$5,461,723,998</b>	<b>\$4,233,925,519</b>	<b>77.5%</b>	<b>\$1,227,798,479</b>	<b>22.5%</b>	<b>*66.8-255.0</b>	<b>\$154,311,552</b>	<b>(\$154,311,552)</b>
<b>Revised Total</b>	<b>\$5,461,723,998</b>	<b>\$4,388,237,071</b>	<b>80.3%</b>	<b>\$1,073,486,928</b>	<b>19.7%</b>	<b>*0.2-255.0</b>		
<i>Hold Harmless</i>							<b>\$154,311,552</b>	<b>\$0</b>
<i>Number of Districts</i>							<b>48</b>	<b>0</b>

## VIII. EDUCATION FUNDING MODEL - FLEXIBILITY AND ALTERNATIVES

### Alternative Assumptions

- The model can be adjusted based upon policy decisions and goals.
- One option is to provide a lower student-teacher ratio for students in grades 1-6. Discussions with the education community and research indicate that lower class sizes in early grades may have a positive influence on student performance.
- Option 5 retains all of the assumptions and allocations in the model but adjusts the student-teacher ratio to 15.5/1 for students in poverty and 20.5/1 for remaining students. All other grades are adjusted up to 17.5/1 and 22.5/1 to account for the lower student teacher ratio and match to the current total classroom teachers.

	Poverty	Non-Poverty	All Students
<b><u>Model</u></b>			
Grade K	16.5	21.5	(One aide for every Kindergarten Teacher)
Grades 1-3	16.5	21.5	
Grades 4-6	16.5	21.5	
Grades 7-8	16.5	21.5	
Grades 9-12	16.5	21.5	
<b><u>Option 5</u></b>			
Grade K	17.5	22.5	(One aide for every Kindergarten Teacher)
Grades 1-3	15.5	20.5	
Grades 4-6	15.5	20.5	
Grades 7-8	17.5	22.5	
Grades 9-12	17.5	22.5	

## OPTION 5 – LOWER STUDENT TEACHER RATIO FOR GRADES 1-6

- Option 5 requires 45,268 teachers compared to 45,277 in the system and 45,241 in the model.
- The total cost decreases, primarily due to the lower number of teachers allocated to kindergarten, which lowers the number of kindergarten aides and costs.
- Overall, Option 5 redistributes similar funding compared to the model of \$173.9 million and has a similar cost share of 77.6 percent state funding compared to 77.5 percent for the model.

	Total Cost	State Share Total \$	State Share %	Local Share Total \$	Local Share %	Local Millage	Districts with Gains	Districts with Loss
<b><u>MODEL</u></b>								
Instruction	\$4,285,662,739	\$3,322,243,461	77.5%	\$963,419,278	22.5%			
Facilities	\$1,005,803,194	\$779,698,098	77.5%	\$226,105,097	22.5%			
District Services	\$170,258,064	\$131,983,960	77.5%	\$38,274,104	22.5%

<i>Number of Districts</i>							<b>55</b>	<b>26</b>

## IX. ACCOUNTABILITY & PERFORMANCE – POLICY DECISIONS

The release of this model also provides a reference point to more specifically identify and set flexibility and accountability standards. To continue the discussion on these items, several questions are repeated below.

### Fiscal Accountability

The model provides districts with specific resources and funding levels.

- What flexibility should districts have in deviating from the model? What are the parameters for fiscal accountability and resource allocation?
  - Flexibility may require changes to regulations or requirements in place currently for specific funding lines reallocated in the model and recommendations for specific items are welcomed.

### Performance

- What are the performance standards districts must meet?
  - The Education Oversight Committee provided input for the report on May 9, 2019, which may be used as a framework for developing performance measures.

# APPENDIX

## Model Assumptions and Allocations - Methodology

### Instruction

#### Classroom Instruction

- The model allocates funding for teachers based upon poverty and non-poverty student counts for basic instruction. Each student is allocated a regular classroom teacher.
- All other classroom instructional areas are based upon total student counts for students requiring specialized education services.
- The model reflects a classroom student to teacher ratio based upon overall statewide classroom teachers and certified professional teaching staff and may be adjusted based upon policy goals.

#### Specialized Instruction

- The model is intended to measure the individual instructional needs of each student and allocate resources for those services.
- The model provides a service allocation for specialized educational instruction, speech therapy, and additional services such as services from orientation and mobility specialists, occupational or physical therapists, psychologists, social workers, and any others deemed necessary.
- Limitations on available data for these specialized education services prohibit the complete development of the model at a detailed level of service until data systems are developed and data can be collected.
- For illustration, an interim model is presented based upon allocating funding for special education services using available data. This simplified structure allocates an additional special education or speech teacher and additional service providers (such as psychologist, orientation & mobility specialist, etc.) for students served under IDEA. This simplified version does not specify the type of service received due to data limitations.
- Development of this section of the model will require additional data systems to collect the number of students utilizing each type of specialized education service.
- Further, additional modifications to the allocation of resources may be necessary to ensure compliance with federal requirements under IDEA. The model provides a baseline to allow the South Carolina Department of Education to review the model in further detail and potentially consult with the U.S. Department of Education to ensure continued compliance with federal requirements.

### Other Specialized Instruction

- The model provides funding allocations for personalized instructional areas currently addressed through the EFA add-on weights. These allocations include resources for gifted and talented, academic assistance, limited English proficiency, and dual credit enrollment.
- These services are allocated a percentage of the cost of an additional teacher based upon the equivalent of the current EFA weighting.
- Career and technology education is allocated funding for a percentage of a teacher equivalent to the additional weighting of 0.29 above the EFA base student weight of 1.0.

### Instructional Support

- School districts are allocated funding for guidance counselors and guidance resources, library/media specialists and library aides, and career specialists based upon the number students in a district.
- Each district is allocated funding for one guidance counselor and guidance support resource for every 350 students.
- Each district is allocated funding for one library/media specialist and one library aide for every 685 students.
- Each district is allocated funding for one career specialist for every 2,260 students.
- The model accounts for the current statewide number of guidance counselors, library/media specialists, and career specialists in PCS. The allocation to each district may vary from the current staffing levels.

### Health Services

- Districts are allocated funding for school nurses based upon the number of students in a district with one nurse for every 600 students. This estimate is based upon providing approximately one nurse per school. Some districts may contract for these services, so additional nurses are added to account for contract positions not in PCS.
- Districts are allocated funding for social workers based upon the number of students in a district with one social worker for every 3,180 students. Data to measure the number of students requiring this service is not available currently. The estimate is based upon a sample of the ratio of social workers to students in districts with social workers included in PCS. Some districts may contract for these services, so additional social workers are added to account for contract positions not in PCS.

## School Administration

- Districts are allocated funding for school administrators based upon the number of teachers in the model with one administrator for every 15 teachers. This allocation is based upon the number of administrators in PCS statewide and may vary from current staffing levels by district.

## Classroom Materials & Technology

- Classroom materials and technology funding is based upon the number of teachers in the model. This initial allocation is based upon a survey of districts' actual spending converted to a per teacher equivalent.

## Facilities

### Facilities

- Facilities funding is allocated based upon the number of teachers, square footage, and current expenditures from a survey of school districts. Each teacher is allocated 2,750 square feet. This calculation is based upon an average school size of 110,000 sq. ft. and an average of 40 teachers per school.
- Funding for custodial services, maintenance, and utilities is based upon a dollar amount per square foot. The cost per square foot is based upon total expenditures from a survey of school districts and covers classrooms, common areas such as cafeterias and gymnasiums, administrative space, and district office facilities expenses.
- This methodology reflects the resources needed for additional class sizes and will change with any adjustments to class sizes in the model.

## Safety and Security

- Each district is allocated funding for one safety personnel for every 640 students based upon a survey of current staffing for school safety and security personnel by school districts.
- Districts utilize a variety of methods to provide safety personnel currently including school resource officers, contracted security personnel, and school monitors. Actual staffing by district may vary from statewide averages.

- Each district is allocated funding for safety and security equipment based upon a survey of current expenditures for school safety and security equipment by school districts.

### Transportation

- Each district is allocated funding for one bus driver for every 110 students. This allocation is based upon a survey of current bus drivers per student. The allocation to each district may vary from the current staffing levels.

### District Services

#### District Leadership and Services

- The model allocates each district funding for one superintendent.
- The model allocates each district funding for program directors to support district services for HR, finance, transportation, food services, student services, and other functions based upon the number of teachers. Each district receives a minimum of 6 program directors with one additional position for every 35 teachers above 350, up to a maximum of 20 directors.
- Each district receives funding for a range of staffing based upon the number of teachers. Each district receives funding for a minimum of 6 staff positions with one additional position for every 35 teachers above 350, up to a maximum of 20 staff positions.

### District Technology

- Each district is allocated funds for district-wide technology based upon the number of teachers.
- The initial model allocations are based upon a survey of school district expenditures.

### Equity

The model addresses equity through two factors:

- The state supports the same resources for all districts:
  - Each district is allocated teachers and resources based upon the services required by the student.
  - State funding is determined based upon the same standards for all districts.
  - District funding for additional teachers or services outside the model is a local decision.

- This change in funding eliminates the potential inequity of the state funding teacher salaries or additional resources for local decisions that are outside the statewide allocations.
- District wealth is measured by taxable property:
  - Each district's funding percentage from the state for the resources required in the model is based upon the district's relative property wealth compared to the rest of the state.
  - A revised index of taxpaying ability is used to determine a district's relative wealth. The index of taxpaying ability currently includes an imputed amount for property tax reimbursements. As property tax reimbursements are reallocated in the model, this imputed amount is excluded from the revised index of taxpaying ability. The revised ITA reflects the property tax wealth that school districts are able to tax for school operations.
  - This change to the measurement of wealth results in an equivalent millage rate required in each district to support the resources in the model.

## Model Assumptions and Allocations - FY 2018-19 Amounts

### Assumptions and Allocations - FY 2018-19

<b>Teacher Cost:</b>		Employer Contribution Rate (Fringe)	28.26%
Salary:	\$44,586		
Employer Contribution:	\$12,600	Average Daily Membership (ADM)	721,122
Health Insurance:	\$6,798	(regular 81 district)	
<b>Total:</b>	<b>\$63,984</b>		

### INSTRUCTION

<b>Measure: Student to Teacher Ratio</b>	<b>Poverty</b>	<b>Non-Poverty</b>	<b>All Students</b>
Grade K	16.5	21.5	(One aide for every Kindergarten Teacher, see below)
Grades 1-3	16.5	21.5	
Grades 4-6	16.5	21.5	
Grades 7-8	16.5	21.5	
Grades 9-12	16.5	21.5	
Additional Special Education for Students Served Under IDEA			
Additional Specialized Resources			120 (All Other Providers)
Specialized Education			N/A (Model: Allocation by Service Measurement)
Speech Therapy			N/A (Model: Allocation by Service Measurement)
Orientation & Mobility			N/A (Model: Allocation by Service Measurement)
Occupational or Physical Therapy			N/A (Model: Allocation by Service Measurement)
Psychologist			N/A (Model: Allocation by Service Measurement)
Paraprofessionals			N/A (Model: Allocation by Service Measurement)

*N/A - Requires additional data collection systems to measure and implement*

## Assumptions and Allocations - FY 2018-19 (Continued)

### Measure: Per Student

	% of Teacher Salary	Amount		Allotment	Students

## Funding Model vs. Education Finance Act

### Funding Model

- District Size: Not applicable
- Non-salary costs: Includes technology and safety equipment (Training included in cost of teacher salary for professional development days)
- Staff
  - 1 school administrator for every 15 teachers
  - 1 school staff for every 15 teachers
  - 1 library/media specialist for every 685 students
  - 1 guidance counselor for every 350 students
  - 1 career specialist for every 2,260 students
  - 1 nurse for every 600 students
  - 1 safety staff for every 640 students
  - 1 superintendent
  - 6-20 program directors (minimum of 6 with 1 additional position for every 35 teachers above 350 to a maximum of 20)
  - 6-20 district staff (minimum of 6 with 1 additional position for every 35 teachers above 350 to a maximum of 20)
  - 1 bus driver for every 110 students
- School facilities
  - 2,750 square feet per teacher

### EFA

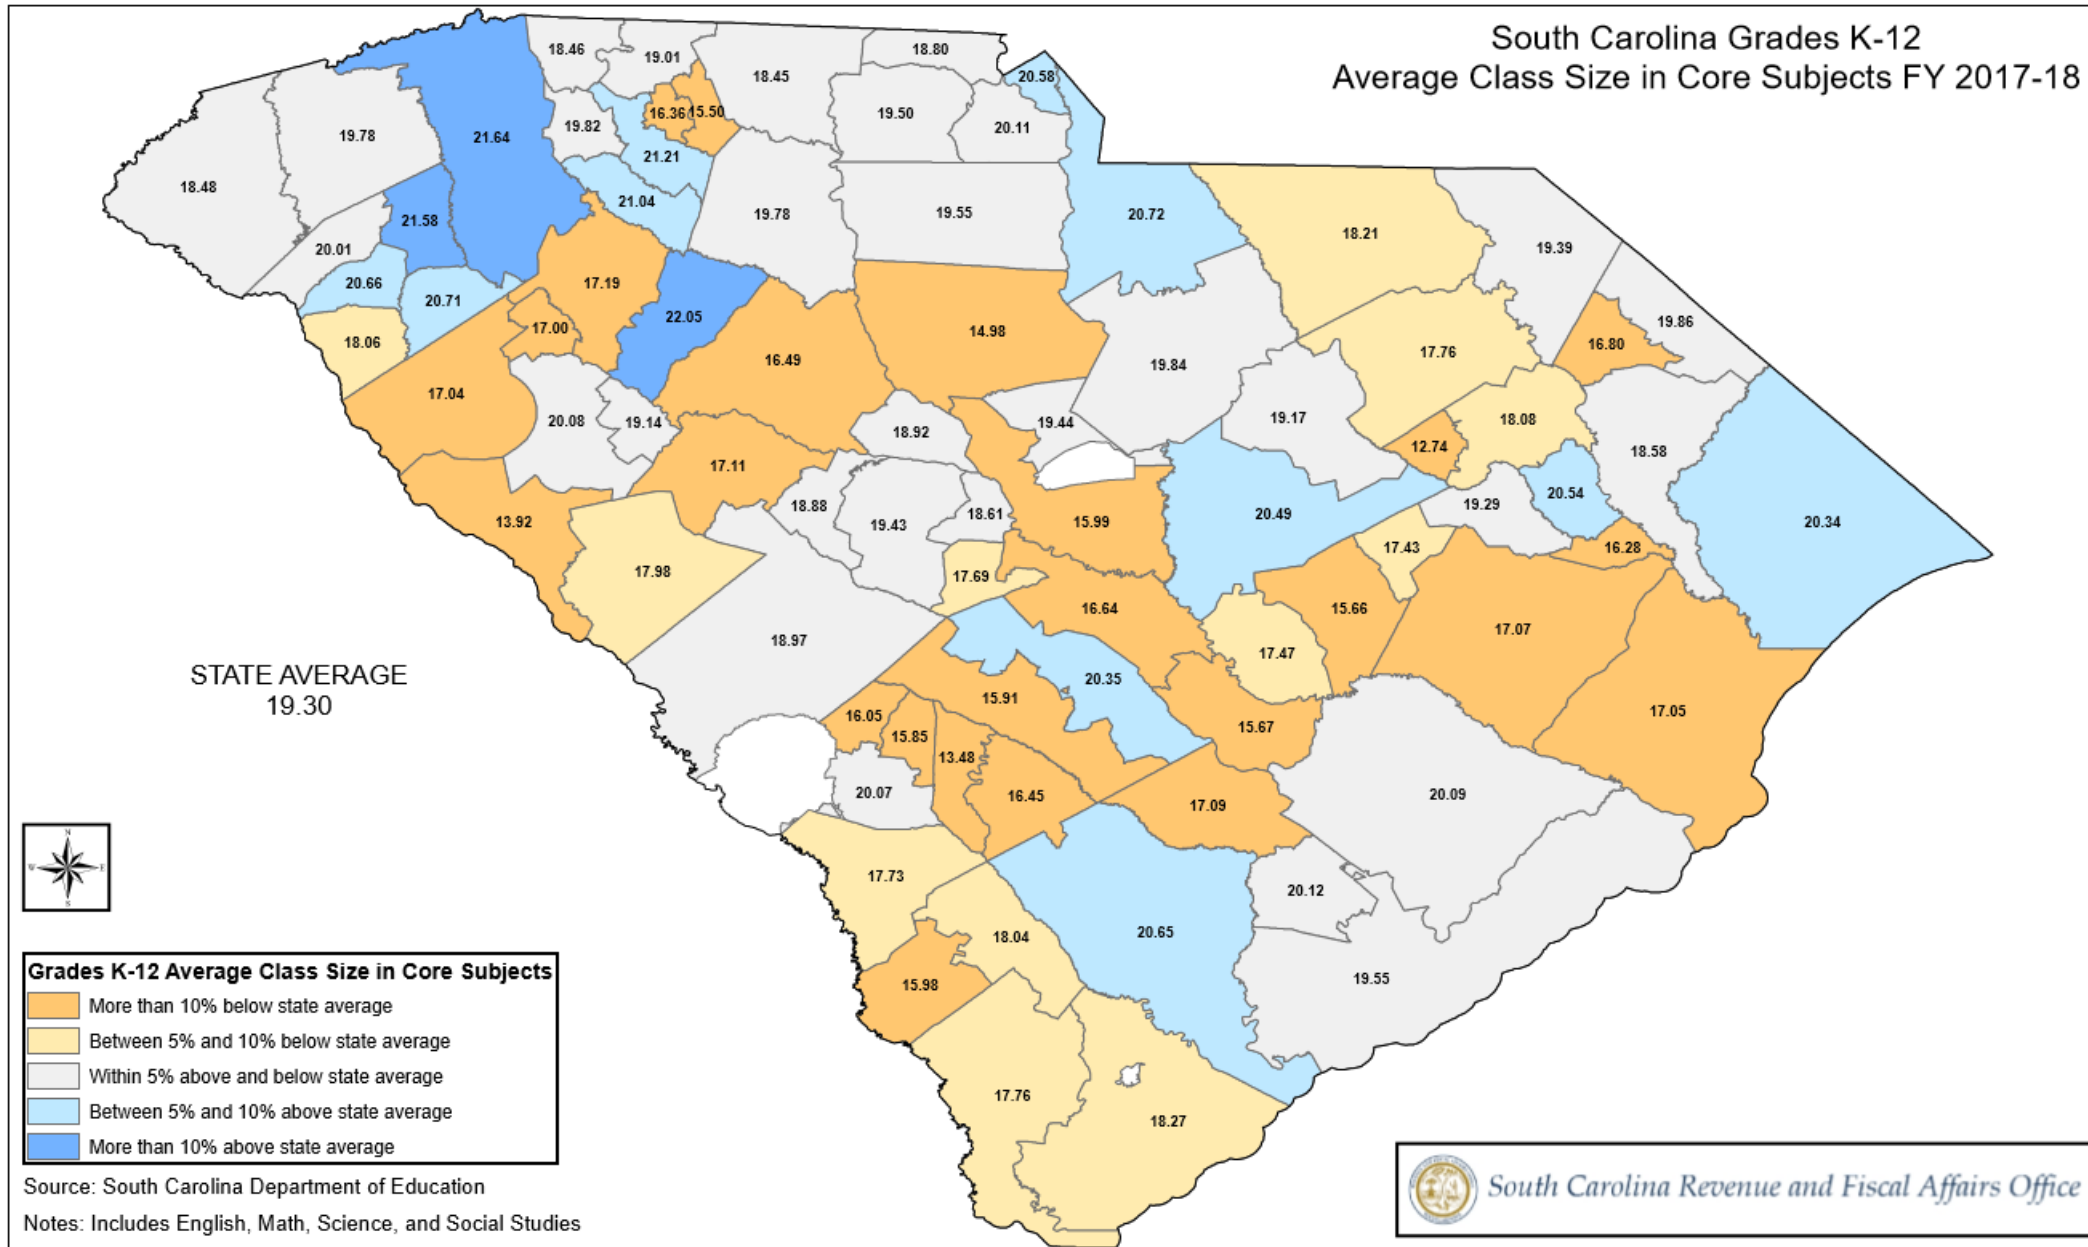

- District Size: School district with 7,620 weighted pupil units and 2,614 students in grades 4-8
- Non-salary costs: Includes materials, supplies, and training
- Staff
  - 4.4 principals
  - 3.9 assistant principals
  - 4.4 secretaries
  - 4.4 clerks
  - 4.4 librarians
  - 3.9 librarian aides
  - 3.9 guidance counselors
  - 100.6 teachers
  - 1 superintendent
  - 1 asst. superintendent
  - 1 finance officer
  - 2 directors
  - 8 consultants
  - 9 administrative secretaries
- School facilities
  - Not included

## Class Size and Student to Teacher Ratio

### Current Class Sizes in Core Subject Areas

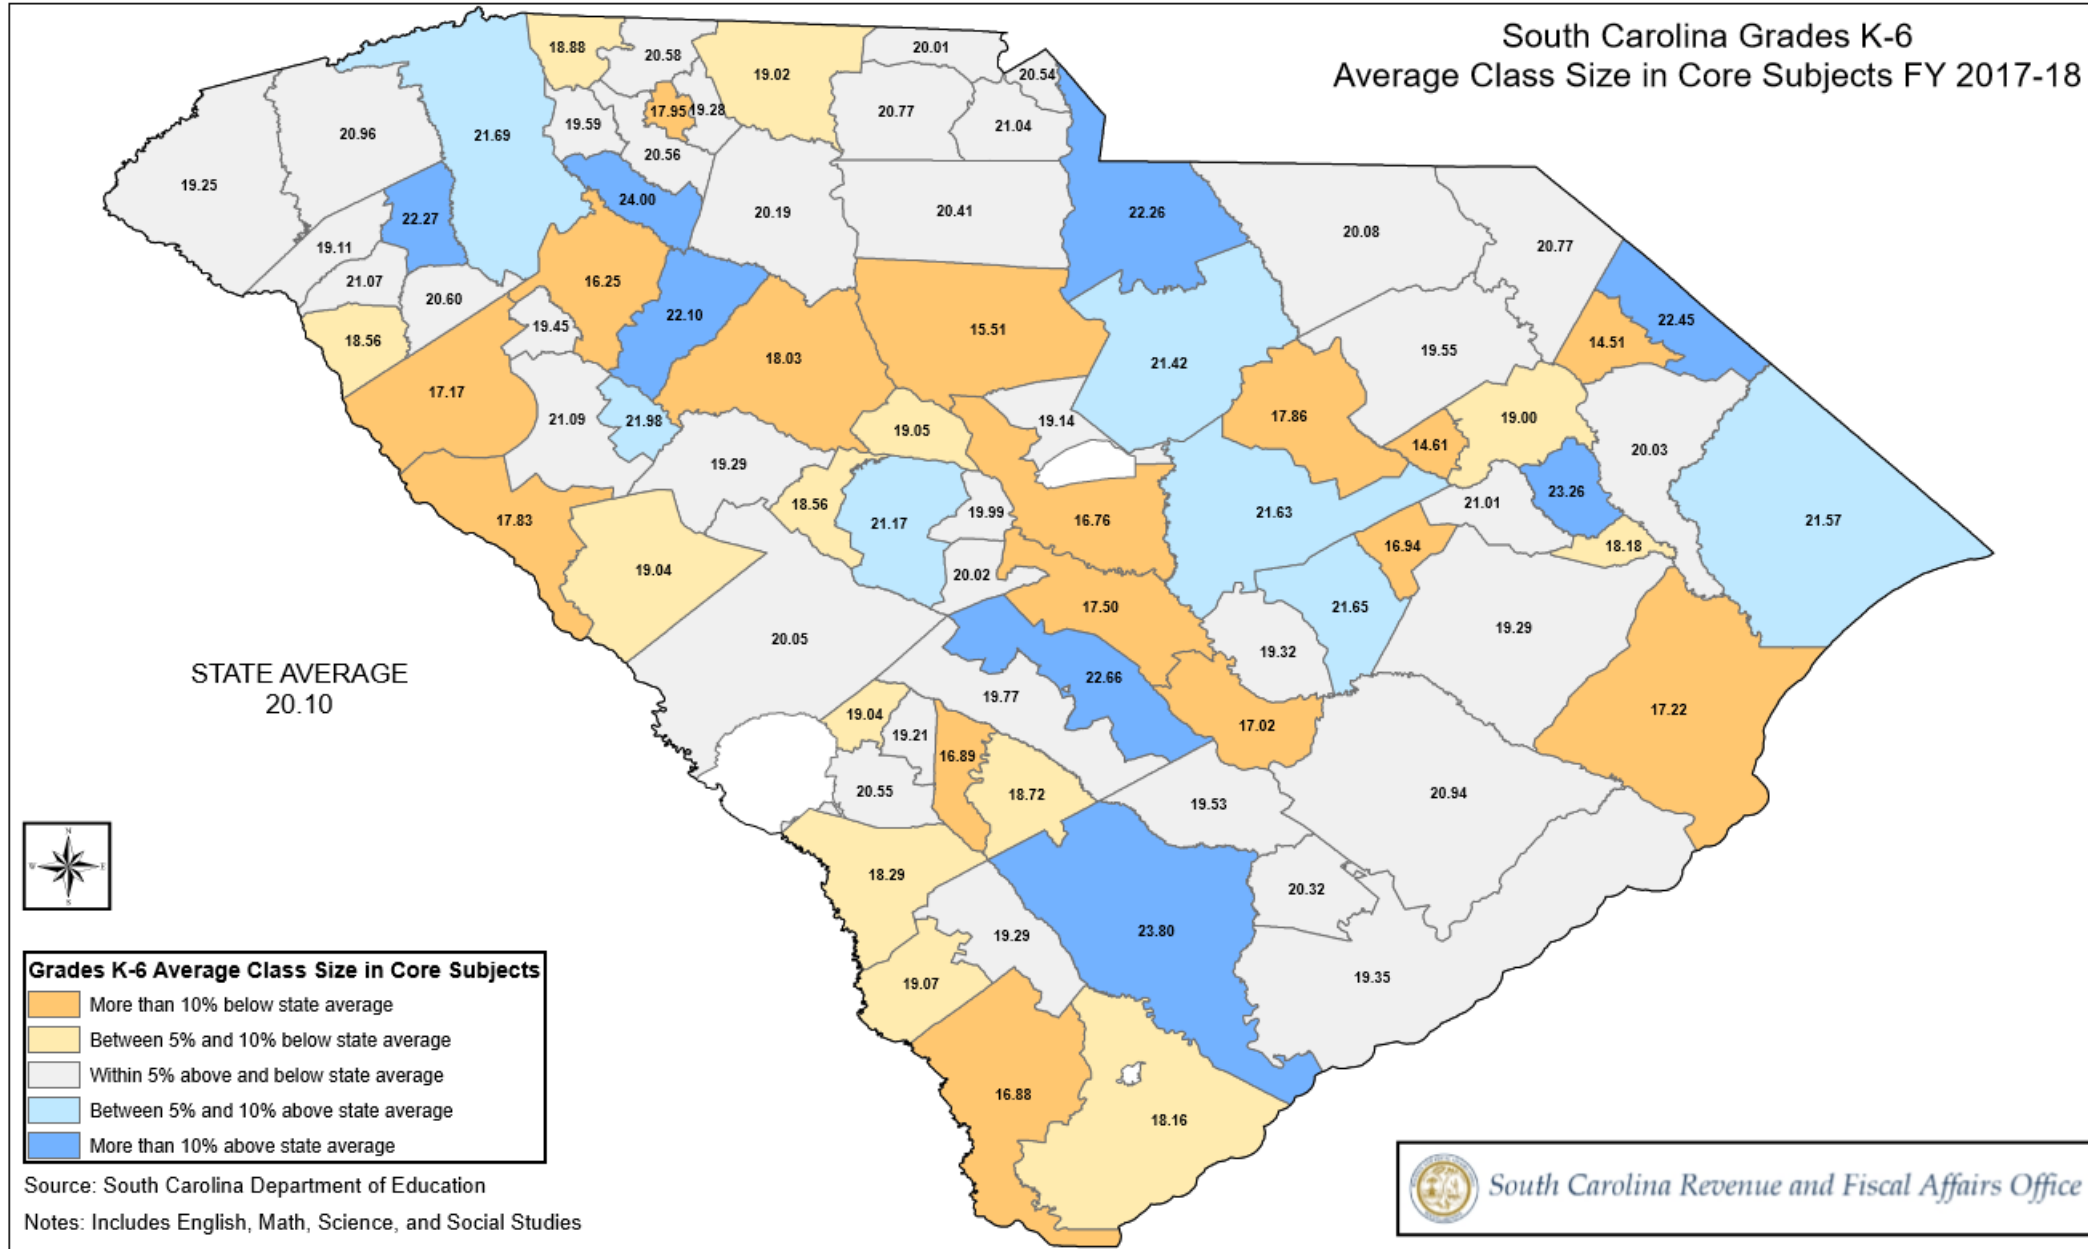

- The model appropriates funding based upon the number of teachers required to serve students. The student to teacher ratio drives the number of teachers needed and the classroom instruction costs.
- Allocation of teachers by districts and class sizes is a local decision. The model provides a targeted student/teacher ratio for each district, but the accountability measures and district choices will ultimately drive class sizes.
- The following maps show the average class size for students in grades K-6, grades 7-8, and grades 9-12 by district in FY 2017-18 in core subject areas of English, math, science, and social studies.
- The average class sizes statewide in core subject areas for FY 2017-18 are:
  - All grades K-12: 19.3
  - K-6 grades: 20.1
  - 7-8 grades: 20.3
  - 9-12 grades: 17.3
- Comparatively the model provides a student/teacher ratio of:
  - All grades K-12: 18.1
  - K-6 grades: 18.1
  - 7-8 grades: 17.9
  - 9-12 grades: 18.1
  - All grades including special education: 15.9
  - Class sizes may not match student/teacher ratios due to district decisions for allocating teachers and resources.

## South Carolina Grades K-12 Average Class Size in Core Subjects FY 2017-18

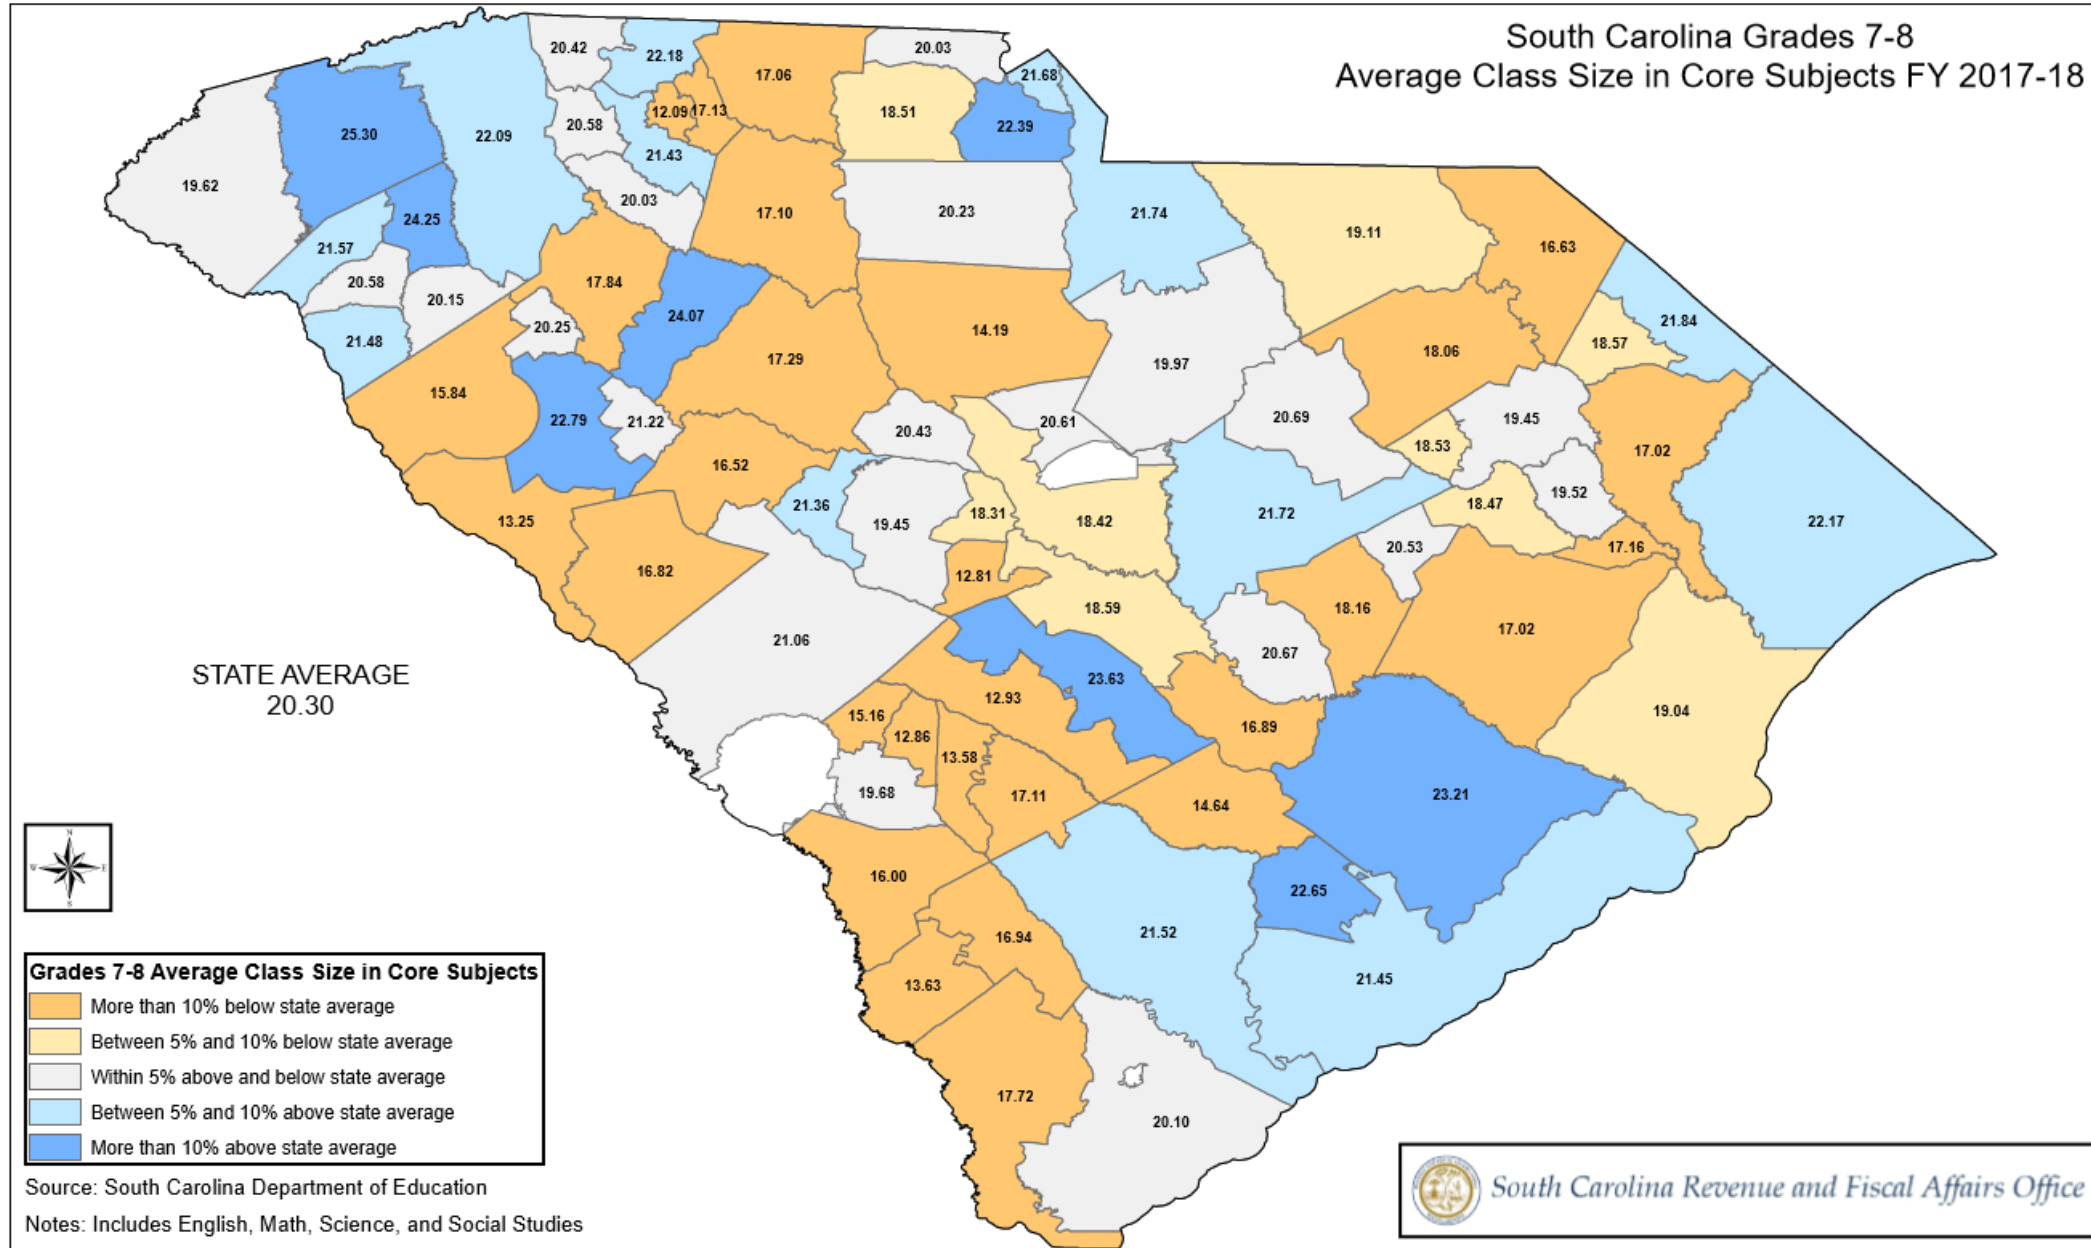

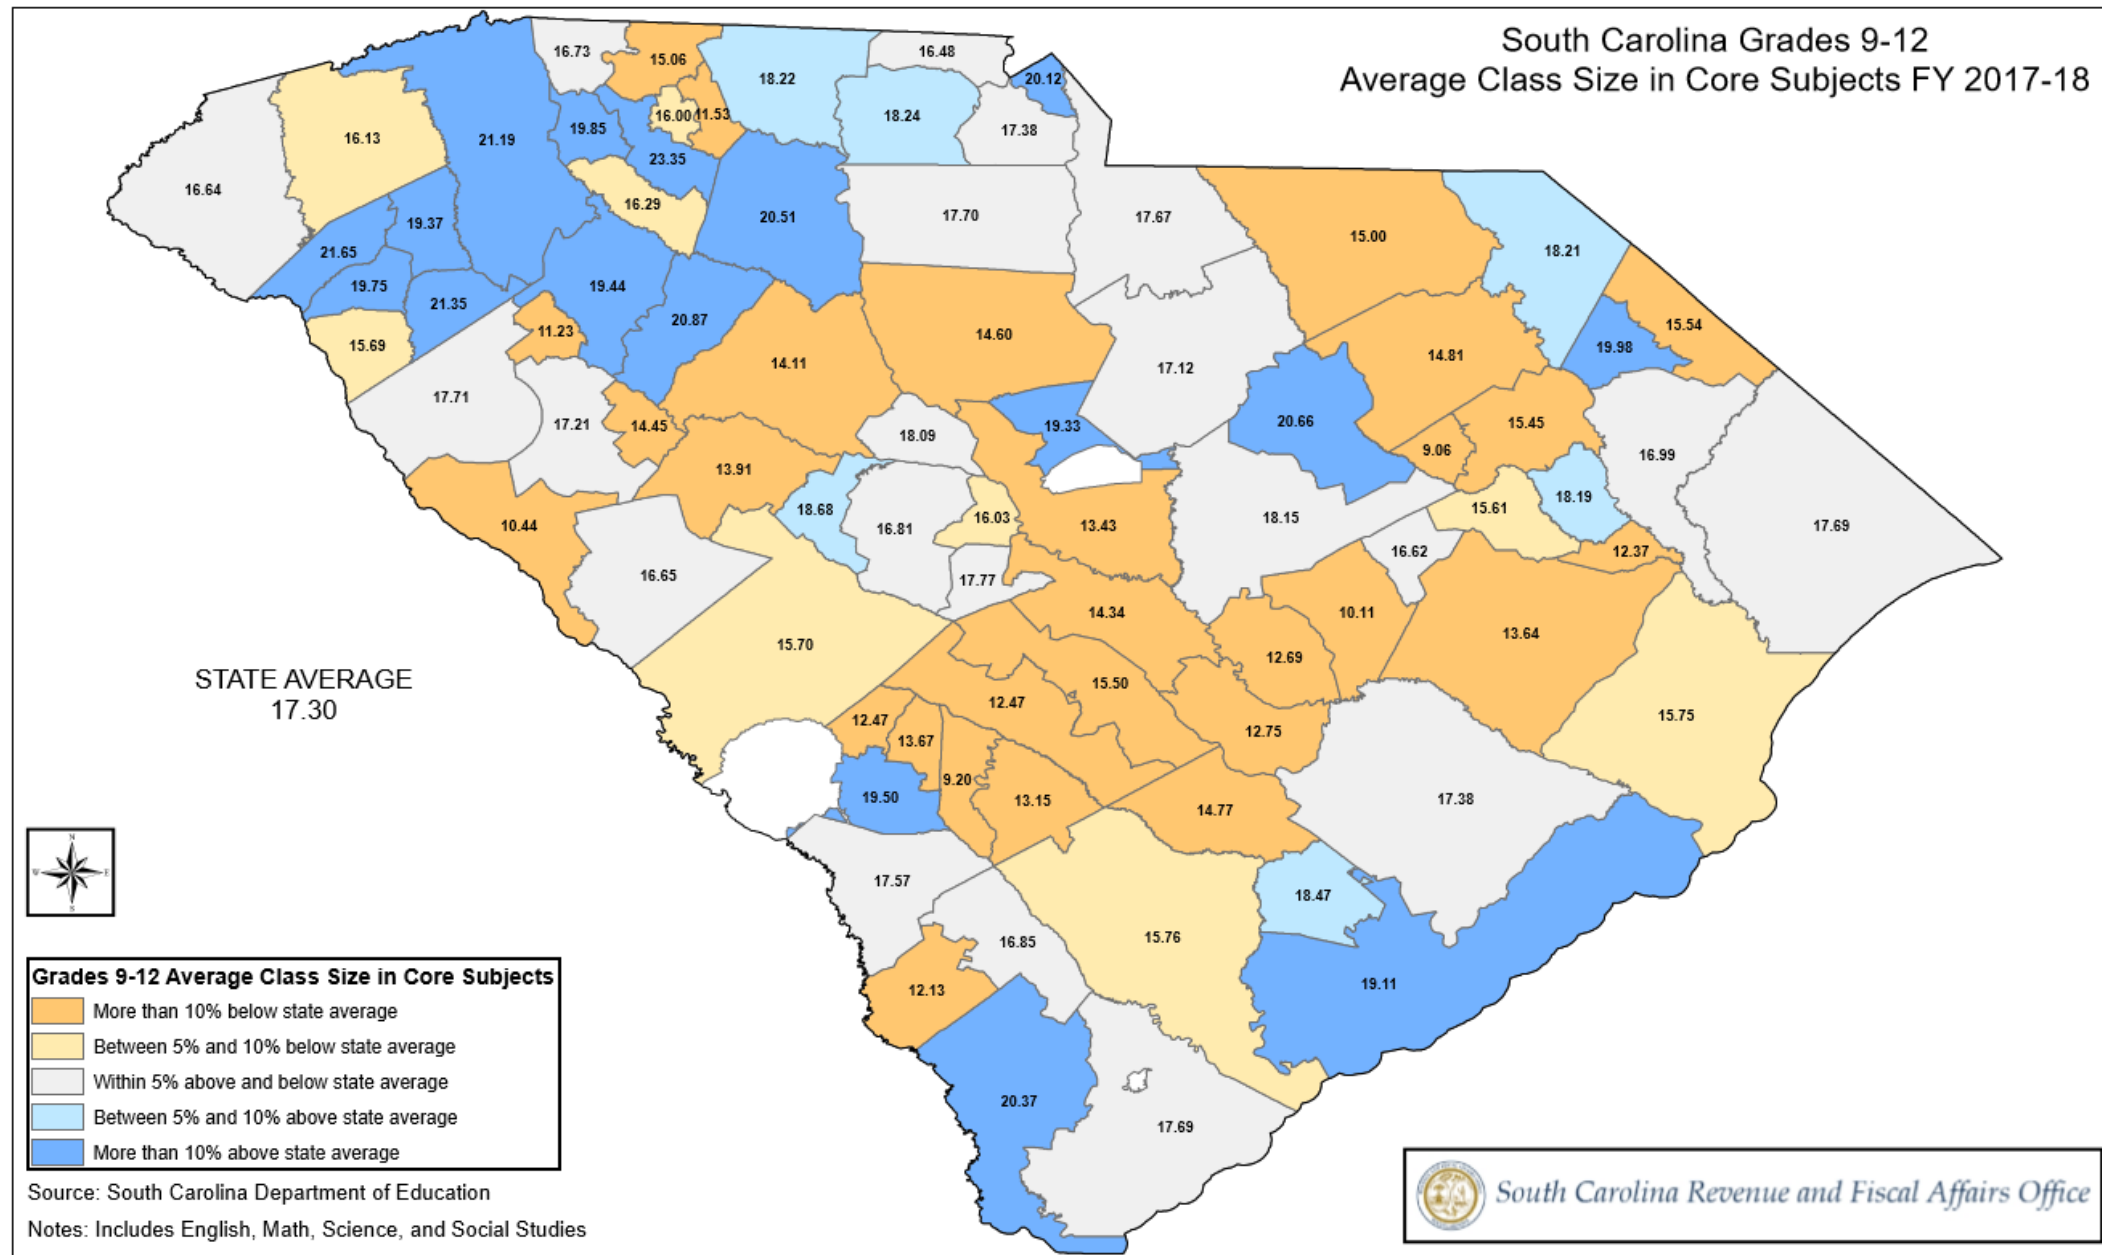

## South Carolina Grades K-6 Average Class Size in Core Subjects FY 2017-18

## South Carolina Grades 7-8 Average Class Size in Core Subjects FY 2017-18

## South Carolina Grades 9-12 Average Class Size in Core Subjects FY 2017-18

## Model & Options - By District

The following tables are included for completeness but may prove difficult to view due to page size limitations. The tables are available in larger formats at <http://rfa.sc.gov/econ/educ/model>.

Tables:

1. Model Staff Count Comparisons to Actual Staff Levels
2. Estimated Financial Impact on Local School Districts
  - a. Model
  - b. Options 1-5
