INFORMATION

Prior years of this report have been revised for new data or corrections. The Revenue and Fiscal Affairs Office uses specific revenue and expenditure items from this report to prepare fiscal impact statements on proposed state law changes regarding taxes imposed by local governments.

Given the use of the data, we request the revenue and expenditure information needed for our analyses based upon the local governments' audited annual financial reports if the audit is complete before the survey is due. However, our report **does not** include some major revenue and expenditure sources not associated with this report in an effort to reduce local government staff time required to research and provide the requested data. Examples of data not included in our annual report include revenue and expenditures of special purpose districts that provide fire protection and water and sewer services. Revenue from water, sewer, and power utilities operated by counties and municipalities is also not included in this report. Information on cash and other reserve accounts is also excluded from the report.

This report is not intended to replace audited financial statements or reflect an opinion on the overall financial status of a local political subdivision. Due to the incomplete nature of the data collected from the local governments, using the data in this report to impute a relationship between total revenues and expenditures for local governments is an incorrect usage of the report. A full examination of a local government's audited annual financial reports would be a more appropriate basis for that type of comparison.

FORMULAS FOR CALCULATED DATA

Millage Rates:

Prior to FY 14:

Total Average Millage Rates (State Summary) – the county assessed value weighted average of the Total Average Millage Rate (by county)

Total Average Millage Rates (by county) - simple average of the total millage rate for each tax district in the county

Beginning in FY 14:

Total Average Millage Rate – the average millage rates by county and statewide are calculated based upon data for Homestead Exempt properties defined under §12-37-220(9). The Homestead Exemption reimbursement for all property taxes other than school operations and an estimate of the reimbursement for school operating taxes are added together and divided by the exempt property assessment to determine the average millage rate for each school district and for the state. Districts in each county are weighted by exempt property value to determine the estimated average for the county.

MISCELLANEOUS

County and city data are due to the S.C. Revenue and Fiscal Affairs Office by January 15th annually, pursuant to S.C. Code of Laws § 6-1-50.

Beginning with the 2013 Report, revenue from bonds and leases was reported at the county and city levels for FY 2012 and forward. Prior to FY 2012, bonds and leases were not separately reported and may be included in Miscellaneous Revenue. School district reporting of these items is unchanged.

Beginning with the 2013 Report, Tax Increment Financing District and Municipal Improvement District revenue was included in Revenues from Local Sources under All Other in the Current Property Taxes section.

County and city revenue listed in Service Revenue and Charges was also revised in the 2013 Report to include only revenue kept by the county and city. Revenue reallocated to the state is not included. (Ex: Assessments sent to the State and Victims' Rights Assessments)

Special Purpose District revenues and expenses represent actual data as reported by the special purpose districts for even numbered years. Revenues and expenses for odd numbered years are estimates based on averages from the actual data reported in the even numbered years, with the exception being FY 2015, which is based on growth rates. Please see appendix for a listing of districts reporting.

Total local option sales tax revenue on the county level for FY 2012 and forward includes revenue from the property tax credit fund and county revenue fund. Prior to FY 2012, data for the county revenue fund was not captured, and only the property tax credit fund portion is included in the local option sales tax revenue on the county level.

Intergovernmental Revenues – State Funds and Grants (Lines 350-540)

Report the full grant amounts received by the county from the State of South Carolina during the most recently completed fiscal year. Some grants awarded to counties have joint participation by the state and federal governments (i.e., a \$1 million hospital grant may be comprised of \$500,000 of federal money and \$500,000 of state money). If you determine that to be the case, report the portion of the grant coming from the State of South Carolina in this section and the amount coming from the Federal government in the previous section entitled "Intergovernmental Revenues – Federal Funds and Grants". *It is important that only state grants be reported in this section.* If you have difficulty determining the source of grant funds, contact your regional council of governments for assistance.

Personnel expenditures are to be reported separately.*** Some typical operating expenses would include rent, utility bills, travel, training, motor fuels, maintenance costs, paper, computer disks, routine office supplies, service contracts for office equipment,

and other contractual agreements, such as leases. Contractual agreements would also include contracts for services with law firms, engineers, architects, accounting firms, and other service contracts. Small item purchases such as pencil sharpeners, paper cutters, and reference books should also be considered current operating expenses although they may be used for many years. *Record only those items purchased during the most recently completed fiscal year.*

Capital purchases – include items that will be used for several budget years. Common examples are office furniture, computers, typewriters, copier machines (bought, not leased), vehicles (bought, not leased), and heavy machinery (bought, not leased). *Do not include the purchase of real property or new construction in this section. Only those expenses incurred during the most recently completed fiscal year should be recorded.*

Intergovernmental expenditures – include payments to other governments, between counties, between a county and a municipality, or a county and a special purpose district. Payments for fire protection services, road maintenance, hospitals, etc., made to another government should be reported. Record only those payments made during the most recently completed fiscal year.

Some types of expenditures may not be applicable to your county. On the other hand, your county may have expenditures that are not listed. When an expenditure is not applicable to your county, leave that item blank. If your county has an expenditure that is not listed, look for a category that might reasonably encompass that activity. Because each county has a different operating structure, placement of expenditures will vary to some degree. However, if care is taken to place expenditure amounts in the most appropriate categories for your county structure, the presentation of the data will accurately reflect the kinds of expenditures that take place in the county.

Intergovernmental Revenues – State Distributed Revenues

Report the municipal revenue that derives from state aid to political subdivisions in the following six items. These payments are made quarterly. Because municipal fiscal years vary from jurisdiction, this information cannot be taken directly from state records.

- **Local Government Fund (Line 410)** – Report the municipality's revenue from the Local Government Fund for the most recently completed fiscal year. This state shared revenue amount replaces the funds which municipalities previously received from the alcoholic liquors tax, bank tax, beer & wine tax, income tax, brokers premium tax, and motor transport tax.

It is often difficult to determine with certainty the source of grants funds for the reasons stated in the following section, “Intergovernmental Revenues – State Funds and Grants”. If you have difficulty determining the source of grant funds, contact your regional council of governments for assistance.

Do not include any matching funds and exclude any grant administration costs paid from municipal or state funds.

Intergovernmental Revenues – State Funds and Grants (Lines 550-660)

Report the full grant amounts received by the municipality from the State of South Carolina during the most recently completed fiscal year. Grants from the State of South Carolina may be difficult to discern. Some grants awarded to municipalities have joint participation by the state and federal governments (i.e., a \$1 million hospital grant may be comprised of \$500,000 of federal money and \$500,000 of state money). If you determine that to be the case, report the portion of the grant coming from the State of South Carolina in this section and the amount coming from the Federal government in the previous section entitled "Intergovernmental Revenues – Federal Funds and Grants". *It is important that only state grants be reported in this section.* If you have difficulty determining the source of grant funds, contact your regional council of governments for assistance.

Do not include any matching funds and exclude any grant administration costs paid from municipal funds.

Intergovernmental Revenues – Other Local Governments (Lines 670-720)

- **Highway Reimbursement** – Report any payments from other local governments (municipal or county) for their participation in highway, road, or street construction and/or maintenance. State and federal monies for highways and streets should not appear in this item. Report only the payments received during the most recently completed fiscal year.
- **Housing & Urban Development** – Report any payments from other local governments (municipal or county) for their participation in a municipal housing or urban development program. State and federal monies for public housing should not appear in this item. Report only the payments received during the most recently completed fiscal year.
- **Contracts for Service Provision – Fire Protection** – Report any payments which the municipality receives from another municipality, county, or special purpose district for the provision of fire protection services. Report revenues received only for the most recently completed fiscal year, regardless of the terms or duration of the contract.
- **Other Contracts for Service Provision** – Describe any other contracts the municipality may have with another municipality, county, or special purpose district for the provision of a service and report the revenue to the municipality for that contract in these items. Report revenues received only for the most recently completed fiscal year regardless of the terms or duration of the contract. For example, if your

municipality is paid a monthly fee to provide fire protection to several small towns, report the total fees collected during the most recently completed fiscal year. If the municipality is under contract to provide garbage pickup for a short time to a nearby special purpose district and the contract is paid in a lump sum, report the full contract amount if it was paid during the most recently completed fiscal year.

- **Payment in lieu of taxes** – Report any amounts paid by local governments in-lieu of municipal property taxes (e.g., payments from a housing authority). Report only those payments that have been received during the most recently completed fiscal year.
- **Other Local Government Revenues** – Report any other payments received from another local government for any purpose not included in the previous items of this section. Specify the purpose for which payments were received.

PART TWO: EXPENDITURES

Expenditures should include current operations, capital purchases and intergovernmental expenditures.

Expenditures treated as special funds for accounting purposes should be placed in “Other Fund”.

Current operations are the day-to-day operating expenses for the different components of municipal government. ***This does not include personnel costs (wages/salaries). Personnel expenditures are to be reported separately.*** Some typical operating expenses would include rent, utility bills, travel, training, motor fuels, maintenance costs, paper, computer disks, office supplies, service contracts for office equipment, and other contractual agreements, such as leases. Contractual agreements would also include contracts for services with law firms, engineers, architects, accounting firms, and other service contracts. Small item purchases such as pencil sharpeners, paper cutters, and reference books should also be considered current operating expenses although they may be used for many years. *Record only those items purchased during the most recently completed fiscal year.*

Capital purchases – include items that will be used for several budget years. Common examples are office furniture, computers, typewriters, copier machines (bought, not leased), vehicles (bought, not leased), and heavy machinery (bought, not leased). *Do not include the purchase of real property or new construction in this section. Only those expenses incurred during the most recently completed fiscal year should be recorded.*

Intergovernmental expenditures – include payments to other governments, between cities, between a municipality and a county, or a municipality and a special purpose district. Payments for fire protection services, road maintenance, hospitals, etc., made to another government should be reported. Record only those payments made during the most recently completed fiscal year.

Some types of expenditures may not be applicable to your municipality. On the other hand, your municipality may have expenditures that are not listed. When an expenditure is not applicable to your municipality, leave that item blank. If your municipality has an expenditure that is not listed, look for a category that might reasonably encompass that activity.

Because each municipality has a different operating structure, placement of expenditures will vary to some degree. However, if care is taken to place expenditure amounts in the most appropriate categories for your municipal structure, the presentation of the data will accurately reflect the kinds of expenditures that take place in the municipality.
