South Carolina - Census Low Response Score* By Census Tract

Forrest W. Elie

*The Census Low Response Score (LRS) is a continuous score that predicts whether a tract will produce a low response rate. The score for a tract is inversely related to the mail return rate from the 2010 Census for that tract. Therefore, the people living in tracts with a lower LRS are more likely to respond to 2020 Census than those with a higher LRS.

What Does the Data Look Like

- State – County – Tract – Block Group – Block
- State – County – VTD (Voter Tabulation Districts) - Block
