

Statement of Estimated Local Revenue Impact

Date: February 26, 2014

Bill Number: S.B. 964

Author: Alexander

Committee Requesting Impact: Senate Finance Committee

Bill Summary

A bill to amend Section 6-1-320 of the 1976 Code relating to the limit on annual property tax millage increases imposed by political subdivisions, to add an exemption for millage imposed by the governing body for operating revenue necessary to retain a fire department's ISO rating.

REVENUE IMPACT ^{1/}

This bill is expected to increase local property tax revenue as a result of a local political subdivision increasing millage above the annual millage increase limitation. The amount of the increase will be dependent upon the determination of the local governing body as to the operating revenue necessary to retain a fire department's ISO rating.

Explanation

This bill would amend the Section 6-1-320 relating to the exemptions for the annual millage increase limitations to allow local political subdivisions to exceed their annual millage cap in order to provide sufficient operating revenue for a fire department to retain its ISO rating. The Public Protection Classification rating by the ISO evaluates a fire department's fire protection capability. The ratings range from a high score of one to a low score of ten. Based upon information provided by ISO, the rating may be reevaluated as often as every 2 years or as infrequently as 10 years depending upon the level of the rating and the changes in the community served by the fire department. Currently, a political subdivision may only increase its millage by the annual increase in the consumer price index and the entity's population. This new exemption to the millage increase limit would allow a local governing body to increase the millage for a fire department's operating revenue in order to retain the fire department's ISO rating. If a local governing body elects to use this exemption to increase millage for fire department operations, local property tax revenue would increase above the currently allowable annual limit. The amount of the increase would depend upon the determination of the local governing body as to the operating revenue necessary to retain the ISO rating.
